Home Prices up but Gains Inconsistently

Home price gains were somewhat mixed in December with some of the S&P Case-Shiller posting larger increases than in November and others negative or unchanged. The U.S. National Home Price Index, covering all nine U.S. census divisions increased 5.4 percent in December compared to a year earlier where the increase in November was 5.2 percent. On a non-seasonally adjusted monthly basis the National Index was up 0.1 percent month-over-month and 0.8 percent when seasonally adjusted.

The 10-City Composite Index posted a slightly lower year-over-year increase than it had in November, **up 5.1 percent** compared to 5.2 percent. The 20-City Composite was unchanged from the increase in November of 5.7 percent. On a monthly basis the 10-City Composite was down 0.1 percent before seasonal adjustment and up 0.7 percent after adjustment. The 20-City was unchanged from November before adjustment but rose 0.8 percent when adjusted. **Ten of 20 cities** reported increases in December before seasonal adjustment; after seasonal adjustment, all 19 cities increased for the month.

Portland, Oregon, San Francisco and Denver continued their pattern of double digit annual increases with Portland gaining 11.4 percent, San Francisco 10.3 percent and Denver 10.2 percent. Thirteen cities reported larger gains in December than November; Detroit's increase was the biggest at 7.1 percent, 1.2 percentage points more than its November gain. Phoenix extended its streak of annual increases to a full year with a 6.3 percent year-over-year change.	51	+6.25%

Bloomberg reported that the 20-City seasonally adjusted index came in exactly where analysts had predicted, up 0.8 percent. They were looking for a slightly higher non-seasonally adjusted number at 0.2 percent and a much higher year-over-year number of 5.9 percent.

"While home prices continue to rise, the **pace is slowing a bit**," says David M. Blitzer, Managing Director and Chairman of the Index Committee at S&P Dow Jones Indices. "Seasonally adjusted, Miami had lower prices this month than last and 10 other cities saw smaller increases than last month. Year-over-year, seven cities saw the rate of price increases wane. Even with some moderation, home prices in all but one city are rising faster than the 2.2% year-over-year increase in the CPI core rate of inflation.

"Sparked by the stock market's turmoil since the beginning of the year, some are concerned that the current economic expansion is **aging quite rapidly**. The recovery is six years old, but recoveries do not typically die of old age. Housing construction, like much of the economy, got off to a slow start in 2009-2010 and is only now beginning to show some serious strength. Continued increases in prices of existing homes, as shown in the S&P/Case-Shiller Home Price Indices, should encourage further activity in new construction. Total housing starts have stayed above an annual rate of one million starts per year since last March and single family home have been higher than 700,000 units at annual rates since June. Housing investment continues its positive contribution to GDP growth."

As of December the two composite indices are **back to their winter 2007 levels** and are down 11-13 percent from the peaks they established in the summer of 2006. Since prices bottomed out in March 2012 the 10-City Composite has recovered by 34.7 percent and the 20-City by 36.3 percent.

The S&P/Case-Shiller Home Price Indices are constructed to accurately track the price path of typical single-family home pairs for thousands of individual houses from the available universe of arms-length sales data. The S&P/Case-Shiller National U.S. Home Price Index tracks the value of single-family housing within the United States. The indices have a base value of 100 in January 2000; thus, for example, a current index value of 150 translates to a 50 percent appreciation rate since January 2000 for a typical home located within the subject market.

The 10-City Composite currently has an index level of 197.21 and the 20-City a value of 182.75. The National Index is at 175.65. Detroit has the lowest index value at 103.77 and Los Angeles has the highest at 240.54.

All Your Mortgage Needs, Professionally Delivered with a Personal Touch

Whether you're a first-time homebuyer hoping to navigate the process of buying a home so that it is a fun and anxiety-free process or a homeowner looking for refinance options that deliver more freedom and flexibility, I can help you analyze your current situation and find money saving options. With expertise in all areas of mortgage and financing, my hope is that once I become your mortgage partner, I'll stay your mortgage partner. With clients from A to Z, files never leave my hands or my desk. From start to finish, every step of the way, my goal is to keep the lines of communication open, provide complete and attentive service, and ensure the most seamless and satisfactory process possible.
