Purchase Mortgage Gain Fails to Fill Refi Gap

Mortgage application volume **decreased** for the second consecutive week as the growing pool of purchase mortgage applications just missed covering the gap from declining refinance activity. The Mortgage Bankers Association said its Market Composite Index, a measure of application activity, dipped 0.1 percent on a seasonally adjusted basis during the week ended April 28, and declined 1.0 percent unadjusted.

Refinancing **did not maintain** last week's flurry of activity. The Refinance Index lost 5 percent when compared to the week ended April 21 and refinancing applications fell back to a 41.6 percent share from 44 percent the previous week.

The seasonally adjusted **Purchase** Index increased 4 percent from a week earlier and grew by 5 percent unadjusted. It was also 5 percent **higher** than during the same week in 2016.
