The Jobs Report Was a Mess—Mortgage Rates Loved It

Last week, we said all bets were off until we saw Friday's jobs report—and that no other piece of economic data moves mortgage rates more reliably. This week proved why that warning is always worth repeating.

It's not that the rest of the week was boring. In fact, the calendar from Monday through Thursday was packed with potentially interesting updates. Highlights included the Fed announcement on Wednesday, the latest inflation data on Thursday (via the PCE report), and a first look at Q2 GDP. But while those events offered a few moments of movement in the bond market, none of them caused much drama for mortgage rates.

That changed in a big way on Friday when the big jobs report (officially called "nonfarm payrolls") came in much weaker than expected. The headline showed 73,000 new jobs versus a forecast of 110,000. That's really only a moderate miss when it comes to this report and not enough in and of itself to put on the show we ended up seeing.

The real story was in the revisions. Payroll counts are always revised as more companies report to the Bureau of Labor Statistics (BLS). This happens for 2 months after the initial release. These 2 months of revisions were uncharacteristically big, accounting for a combined 253,000 reduction in the job count thus significantly downgrading the recent picture of the labor market.

National Average Mortgage Rates

	Rate	Change	Points
Mortgage News Daily			
30YR Fixed	7.22%	-0.08	0.00
15YR Fixed	6.85%	-0.06	0.00
30YR FHA	6.89%	-0.06	0.00
30YR Jumbo	7.40%	-0.05	0.00
7/6 SOFR	6.73%	+0.02	0.00
30YR VA	6.90%	-0.07	0.00

Why does that matter for mortgage rates? Because a slower labor market leads to more bond buying, which in turn pushes rates lower. It also makes the Fed more likely to cut rates. Mortgage rates aren't tied to the Fed rate, but they do move lower in anticipation if a rate cut is widely expected. You could say that mortgage rates don't correlate well with the Fed Funds Rate itself, but very well with Fed Funds Rate expectations. And here's what those expectations did on Friday:

Mortgage rates followed suit with the average lender offering some of their best rates since early April. Some lenders even made mid-day improvements as markets continued to rally.

By the end of the day Friday, the average 30-year fixed rate had fallen by roughly an eighth of a percent, bringing us within striking distance of the lowest levels since October 2024.

Looking ahead, this jobs report puts much more weight on the next round of data. Inflation reports will be closely watched, but so will the next jobs report in early September—just two weeks before the next Fed meeting. Markets are now actively pricing in the possibility of a rate cut at that meeting. Whether or not it actually happens will depend entirely on how the incoming data stacks up.

For now, the takeaway is simple: this was a good week for mortgage rates, and it came thanks to a labor market report that strongly suggested things are cooling off. If that trend continues, rates could move lower still. If not, the recent improvement could be short-lived.

About Me

I'm the Founder & CEO of World Home Loans, a mission-driven mortgage brokerage built with one purpose: to give consumers, especially Veterans, the respect, speed, and savings they deserve when financing a home.

Over the past 2 years, I've personally closed over 600 VA purchase loans and personally funded more than $375M in the past 12 months. Along the way, I learned that America's Veterans are too often underserved by big-box lenders—facing higher rates, slower closings, and a lack of genuine care. That's why I built World Home Loans.

Our Mission:
• To serve our Veterans by offering ultra-low mortgage rates and closing costs.
• To empower Veterans with the knowledge and resources needed to make informed home financing decisions.
• To stand against and eliminate the widespread overcharging of Veterans that has persisted in the mortgage industry for decades.

At World Home Loans, we back this mission with execution:
Faster closings (our average is 18 days)
Better pricing (consistently beating national averages)
White-glove experience that earns 5-star reviews at scale
A platform where top producers can 2–3X their volume through efficiency, brand power, and unmatched VA expertise.

With "Victory on the Home Front" as our rallying cry, World Home Loans is on course to become the dominant VA-focused lender in the country.

Alongside building WHL, I'm writing my book The Efficient Closer: Building a Mortgage Empire with Precision and Purpose—a playbook for originators who want to scale with speed, systems, and execution.
