Biggest Monthly Gain For New Home Sales in 10 Years

Rather than the month-over-month decline expected, July new home sales **soared** above 600,000 units for the first time since late 2007. The U.S. Census Bureau and Department of Housing and Urban Development reported on Tuesday that newly constructed homes sold at a seasonally adjusted annual rate of 654,000 during the month, a 12.4 percent gain from June's downwardly adjusted rate of 582,000 (from 592,000). This was a **31.3 percent increase** from a year earlier when sales sold at a rate of 498,000 units.

Analysts surveyed by Econoday had expected sales to come in somewhere in the range of 556,000 to 590,000. The consensus was 580,000 units.

On a non-seasonally adjusted basis there were 57,000 new homes sold, up from 53,000 in June and 43,000 in July 2015.

The **median price** of a home sold during the month was \$294,600 compared to 296,000 a year earlier. The average price was \$355,800, up from \$341,900. In its report on the July data Econoday repeated their contention from June that sales are getting a boost from builder discounts. They cite the negative change in the year-over-year median price of homes sold as further evidence.
