Black Knight Home Price Index Hits All-Time High

The third major home price indicator of the month was released on Monday and again there was **no indication that the rate of appreciation is slowing**. Black Knight Financial Services said prices, as measured by its National Home Price Index (HPI) increased from March to April by 1.2 percent. The index reading of \$275,000, was the highest in the HPI's history. The month-over-month increase in the index has brought prices up 3.6 percent since the first of the year, with the bulk of that growth, an aggregate of 2.5 percent, coming in March and April.
