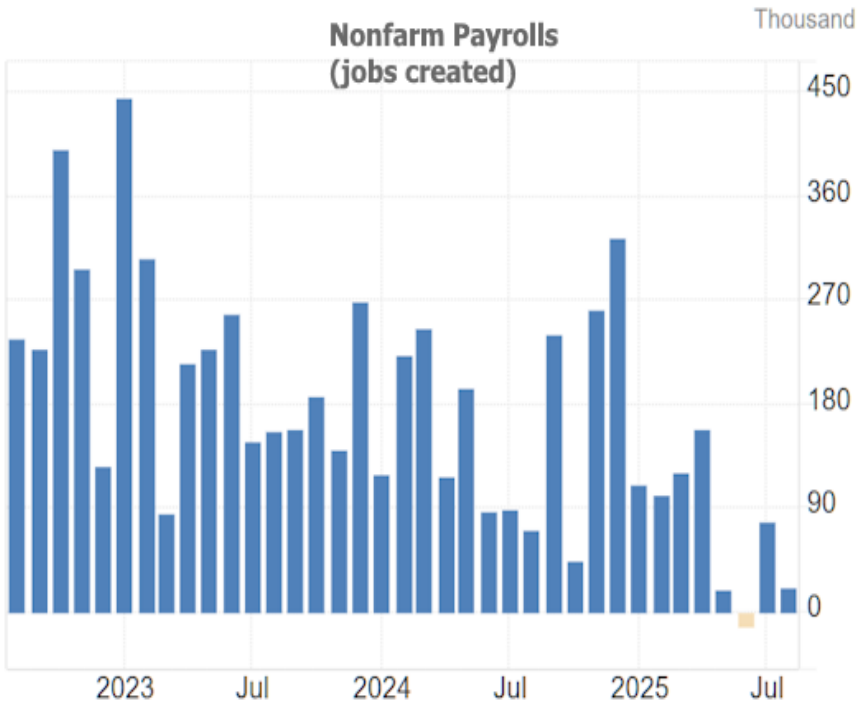
Job Count and Mortgage Rates Go Cliff-Diving

Rates actually began the week with a modest move higher for a variety of boring, technical reasons that no one will remember or care about after seeing how things ended up on Friday.

The move was already reversing on Wednesday with help from economic data (lower Job Openings in July, not to be confused with Friday's jobs report for August). At that point, rates had already officially hit new 11-month lows, even if just barely.

Thursday saw additional improvement despite mixed economic data. This had more to do with traders closing out trading positions ahead of Friday's big jobs report than anything.

Friday's jobs report was always going to be this week's main event, and it was much weaker than expected with only 22k new jobs added in August versus a median forecast of 75k. Revisions to the past 2 months were much smaller this time around, but were net-negative yet again.



MBS and Treasury

	Price / Yield	Change
MBS UMBS 6.0	99.81	-0.02
10 YR Treasury	4.9299	+0.0084
30 YR Treasury	5.3082	+0.0081

Pricing as of: 10/30 5:59PM EST

Recent Housing Data

		Value	Change
Mortgage Apps	Oct 21	195	+3.39%
Building Permits	Sep	1.4M	+0.43%
Housing Starts	Sep	1.22M	-4.24%
New Home Sales	Sep	676K	-1.17%
Pending Home Sales	Aug	71.2	0%
Existing Home Sales	Oct	3.99M	+0.25%
Builder Confidence	Oct	29	-9.38%

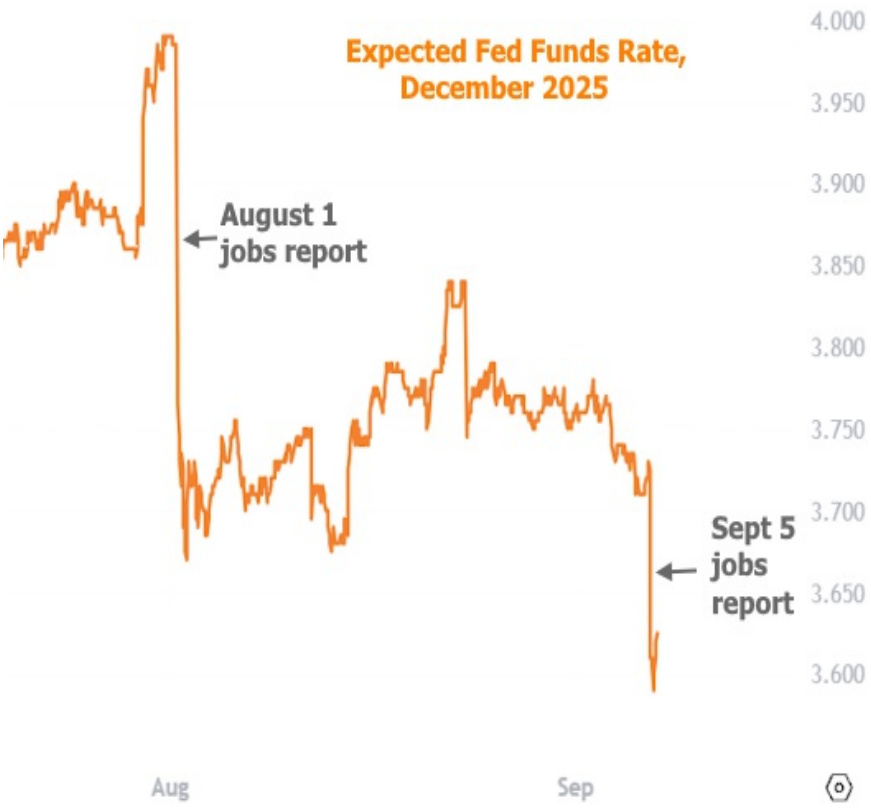
All of the above paints a picture of a labor market that is measurably deteriorating. The labor market is one of two key considerations for the Fed. The weaker it is, the more inclined they are to cut the Fed Funds Rate. This chart shows the market's expectation for the Fed Funds rate at the end of 2025, based on Fed Funds Futures trading:



But forget the Fed. By the time they cut, the bond market will have long since responded to all of the data that made the case for the cut. Bonds (like Fed Funds Futures above) react to the data in real time.

In general, weaker jobs numbers prompt investors to buy bonds. When investors buy bonds, the price of those bonds goes up. When bond prices go up, rates go down. The 10yr Treasury yield is a popular way to visualize real-time reactions in longer-term rates.

The bonds that underlie mortgage rates had a similarly awesome Friday. The net effect was the biggest single day drop in 30yr fixed rates in more than a year, and an average top tier 30yr fixed rate that is back in the same range as the low rates in the Fall of 2024.

Who We Are

When choosing a mortgage loan officer, trust is a key component. You want a lender who will honor their commitments, create a satisfying customer experience and recommend and provide loan products that meet your financing goals. We are readily accessible and committed to serving you and your needs. We aim to not only meet, but to exceed your expectations. We are a lender you can trust.
