Inventories Driving Price Gains Despite Rates

Home prices, as measured by the Federal Housing Finance Agency's (FHFA's) Housing Price Index (HPI), rose **even faster** on an annual basis in December than they had earlier in the fall. The year-over-year gain was 6.2 percent, up from 6.1 percent in the 12 months ended in November, and 6.0 percent in October.

FHFA's HPI report, which this month also included **fourth quarter** data, is based on purchase prices of homes with mortgages backed by or sold to one of the two GSEs Fannie Mae and Freddie Mac.

On a quarterly basis, the HPI was **up 1.5 percent** compared to the third quarter. The monthly change from November to December was 0.4 percent, down from a 0.5 percent gain from October to November.

"Although interest rates **rose sharply** during the fourth quarter, our data show no signs of a home price slowdown," said FHFA Deputy Chief Economist Andrew Leventis. "Although it will certainly take more time for the full effects of the elevated interest rates to be felt, there is no evidence of a normalization in the unusually low inventories of homes available for sale, which has been the primary force behind the extraordinary price gains."

Recent Housing Data

		Value	Change
Mortgage Apps	Aug 28	226.9	+0.49%
