Lowest Rates Since May, But There's a Catch

Rates ended the week at the best levels since late May. That sounds pretty great, right?! Unfortunately, there's a fairly big catch.

The problem with the past month and a half is that the range has been excruciatingly narrow. In fact, if you've been in the market for a loan during that time, you probably haven't seen your quoted interest rate change at all.

The chart below only **looks** like it's moving in July because it is adjusted for small day-to-day changes in lenders' **upfront costs**. That's a bit of tricky topic because "upfront costs" mean different things to different people. In this case, it refers to the costs that correspond with any given rate on a lender rate sheet.

These upfront costs let us see mortgage rate movement even if the payment rate or "**note rate**" isn't moving. Think of them as fine-tuning adjustments.

National Average Mortgage Rates

	Rate	Change	Points
Mortgage News Daily			
30 Yr. Fixed	7.07%	+0.02	0.00
15 Yr. Fixed	6.45%	0.00	0.00
30 Yr. FHA	6.51%	+0.02	0.00
30 Yr. Jumbo	7.26%	0.00	0.00

MBS GNMA 5.5	99.10	-0.44
10 YR Treasury	4.4069	+0.0089
30 YR Treasury	4.5678	+0.0038

Pricing as of: 7/1 4:52AM EST

Recent Housing Data

		Value	Change
Mortgage Apps	Jun 12	208.5	+15.58%
Building Permits	Mar	1.46M	-3.95%
Housing Starts	Mar	1.32M	-13.15%
New Home Sales	Mar	693K	+4.68%
Pending Home Sales	Feb	75.6	+1.75%
Existing Home Sales	Feb	3.97M	-0.75%
Builder Confidence	Mar	51	+6.25%

Average Mortgage Rates

Average Mortgage Rates

Why does any of that matter? In one sense, it prepares you to be appropriately cynical about next week's potential mortgage rate headlines. Beyond that, the sideways grind in rates is one of our industry's most visible manifestations of the uncertainty in broader financial markets.

Part of the uncertainty is due to the general realities of summertime trading--especially in the bond market (which underlies rates). A **bigger driver of uncertainty** is something we talked about in [last week's newsletter](#): the implementation of tariffs on China and the fear of market backlash.

There's a visible reference to the uncertainty in the correlation between stocks and bonds heading into the end of last week. We often see both sides of the market huddle together with higher lows and lower highs, waiting for an indication of the next big move. The chart below shows that stocks quickly forgot about last week's fears while the jury is still out for bonds.

Stocks vs Bonds

So **who's telling the truth here?** Did stocks jump the gun or are bonds taking too much time to decide? As is often the case, zooming out a bit will tell us what we need to know. Incidentally, BOTH stocks and bonds are still in bigger-picture consolidation patterns for essentially all of 2018.

Stocks vs Bonds

In other words, neither side of the market is telling the truth OR lying. Both still aren't exactly sure which way the next move will go. If past precedent is any guide, we may be waiting to find out conclusively until the summertime trading slowdown ends in September. Either way, the presence of these consolidations **greatly increases the odds** of a bigger move on the horizon.

Real Talk

At The Rate Shop, we're not your average mortgage banker. We specialize in bringing you ridiculously low interest rates that will make you wonder what the other guys are doing. In fact the ONLY objection we ever hear is "your rates sound too good to be true". Well they're not, and here is why...

After 15 years in the retail banking world I was frustrated with the high interest rates that came from that business model. As I looked around at all the bloated layers of management and their expensive salaries and the overhead of running a larger company (think rent costs, employee health and benefit costs, payroll taxes, and on and on) it dawned on me that I was a part of the problem, and the solution, for me at least, was so easy to see.

Start my own mortgage brokerage shop. No expensive executive salaries, no expensive building to pay rent at, no unnecessary employees and all the costs that are associated with that. What happens when you cut out all the fat? You can provide lower rates and lower closing costs. It's simple. Now here is the best part, you still get great service from a local Kansas City Lender. My mission is to let everyone know that low rates and great customer service are NOT mutually exclusive.

Thanks for coming along on this journey where Low Rates meet Great Service. The two do NOT have to be mutually exclusive. It's just a lie that the big box mortgage companies have been telling you for years. Don't believe me? Give me a call or shoot me a text on my personal cell phone today and compare my rates and costs up against any other lender in the country, and be prepared to be blown away.

Mike Baker
