## Is This The Last Chance for Low Rates?

Interest rates have enjoyed several months of prosperity without any major bounce back toward higher levels, but that **might be changing as of this week**. Could this be the last time we see rates this low for a while?

The answer depends on the definition of 'a while.' There's **always** some risk that rates will rise for longer than we might like or expect. If we're talking about the length of time that most prospective mortgage borrowers have a loan in process, that risk is a bit bigger than normal at the moment. The saving grace is that rates will almost certainly be lower than they are today at some point in 2019.

But why is there a greater risk of rising rates right now?

This has to do with timing and a few other factors. For roughly 2 straight years, rates did **almost nothing but move higher**. The first half of 2017 was something of an exception as rates managed to recover, somewhat, from the big spike at the end of 2016, but it wasn't much of a consolation in the bigger picture. Besides, it was **right back to higher rates** heading into 2018.

At that time, we began seeing indications of renewed **parallels between stocks and rates**. In fact, the stock surge seemed to lead rates at the beginning of 2018. After a sideways summer, stocks ramped back up and hit long term highs in the Fall. Rates seemed to follow. The correlation became clear when stocks began tanking in October. Rates never went meaningfully higher after that. The following chart lines up several of these milestones.

## National Average Mortgage Rates

	Rate	Change	Points
--	------	--------	--------

### Mortgage News Daily

30 Yr. Fixed	7.07%	+0.02	0.00
15 Yr. Fixed	6.45%	0.00	0.00
30 Yr. FHA	6.51%	+0.02	0.00
30 Yr. Jumbo	7.26%	0.00	0.00
5/1 ARM	7.02%	-0.01	0.00

### Freddie Mac

30 Yr. Fixed	6.86%	-0.01	0.00
15 Yr. Fixed	6.16%	+0.03	0.00

Rates as of: 6/28

## Market Data

	Price / Yield	Change
MBS UMBS 5.5	98.49	-0.45
MBS GNMA 5.5	99.10	-0.44
10 YR Treasury	4.3951	-0.0029
30 YR Treasury	4.5659	+0.0019

Pricing as of: 7/1 2:44AM EST

## Recent Housing Data

		Value	Change
Mortgage Apps	Jun 12	208.5	+15.58%
Building Permits	Mar	1.46M	-3.95%
Housing Starts	Mar	1.32M	-13.15%
New Home Sales	Mar	693K	+4.68%
Pending Home Sales	Feb	75.6	+1.75%
Existing Home Sales	Feb	3.97M	-0.75%
Builder Confidence	Mar	51	+6.25%

Rates vs Stocks

All of the above **sounds like good news** for rates. And it would be, were it not for the fact that stocks have been in the process of bouncing higher in January 2019. Actually, stocks first bounced at the end of December while rates were able to continue lower. But rates eventually followed suit in early January. Since then, the correlation has strengthened again. That's hard to see on the chart above, but easier to see on the shorter-term charts below (same indicators, different scaling).

Rates vs Stocks

Rates vs Stocks

The bottom line is that interest rates have **relied on exceptional weakness** in the stock market. If stocks manage to shake off that weakness, it could be very hard for rates to hold on to any semblance of long-term lows.

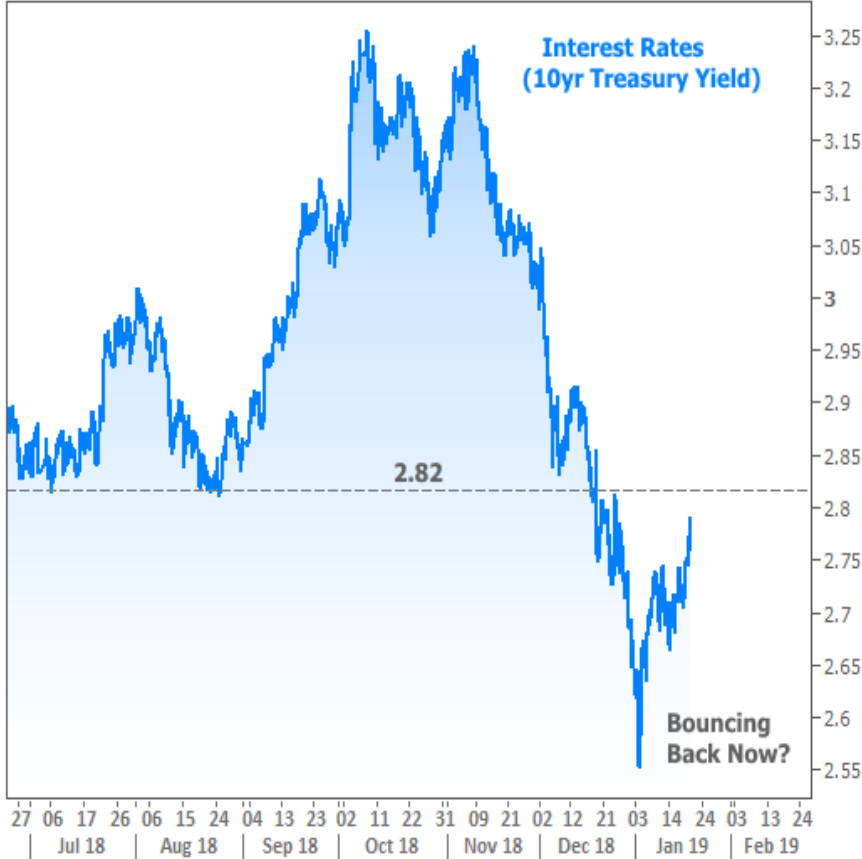

The government shutdown and trade negotiations are **complicating factors**. Investors are currently sprinkling a bit of caution into their outlook until these uncertainties are resolved. For investors, "caution" is often synonymous with "sell stocks, buy bonds" (bond buying = lower rates). The implication is that the end of the government shutdown and the inking of a trade deal would only suggest higher stock prices and more pressure on rates.

With all of the above in mind, is there **any reason to hold out hope?**

Despite the apparently strong case for gloom and doom, there are reasons for hope. Nothing will change the fact that this economic expansion cycle is historically long and that investors are nervous about it ending. The Fed is increasingly talking like it might be done hiking rates if economic data doesn't support it. If the data begins to shift, it could easily prevent stocks from continuing higher and reinvigorate the interest rate rally.

Moreover, the most recent jump in rates hasn't been excessive so far. Ever since rates bottomed out 3 weeks ago, 2.82% in 10yr Treasuries has been an **important line in the sand** standing between the lowest rates for most of 2018 and the past few weeks. In other words, we could overlook a bit of additional weakness in rates, as long as we see some show of support just overhead.

## Real Talk

At The Rate Shop, we're not your average mortgage banker. We specialize in bringing you ridiculously low interest rates that will make you wonder what the other guys are doing. In fact the ONLY objection we ever hear is "your rates sound too good to be true". Well they're not, and here is why...

After 15 years in the retail banking world I was frustrated with the high interest rates that came from that business model. As I looked around at all the bloated layers of management and their expensive salaries and the overhead of running a larger company (think rent costs, employee health and benefit costs, payroll taxes, and on and on) it dawned on me that I was a part of the problem, and the solution, for me at least, was so easy to see.

Start my own mortgage brokerage shop. No expensive executive salaries, no expensive building to pay rent at, no unnecessary employees and all the costs that are associated with that. What happens when you cut out all the fat? You can provide lower rates and lower closing costs. It's simple. Now here is the best part, you still get great service from a local Kansas City Lender. My mission is to let everyone know that low rates and great customer service are NOT mutually exclusive.

Thanks for coming along on this journey where Low Rates meet Great Service. The two do NOT have to be mutually exclusive. It's just a lie that the big box mortgage companies have been telling you for years. Don't believe me? Give me a call or shoot me a text on my personal cell phone today and compare my rates and costs up against any other lender in the country, and be prepared to be blown away.

**Mike Baker**
