Housing Market Gearing Up For a Big Week Ahead

To understand what's at stake in the week ahead, we need to understand where we are and where we've been. With that in mind, here's a **quick recap** of the past year or so in global macroeconomics.

Rates were near long-term highs in the first part of 2018 following the passage of the tax bill and generally strong economic data. As seen in the following charts, this took a toll on loan applications, home sales and eventually on **home values**.

National Average Mortgage Rates

	Rate	Change	Points
--	------	--------	--------

Mortgage News Daily

30 Yr. Fixed	7.07%	+0.02	0.00
15 Yr. Fixed	6.45%	0.00	0.00
30 Yr. FHA	6.51%	+0.02	0.00
30 Yr. Jumbo	7.26%	0.00	0.00
5/1 ARM	7.02%	-0.01	0.00

Freddie Mac

30 Yr. Fixed	6.86%	-0.01	0.00
15 Yr. Fixed	6.16%	+0.03	0.00

Rates as of: 6/28

Market Data

	Price / Yield	Change
MBS UMBS 5.5	98.49	-0.45
MBS GNMA 5.5	99.10	-0.44
10 YR Treasury	4.3971	-0.0009
30 YR Treasury	4.5659	+0.0019

Pricing as of: 7/1 2:48AM EST

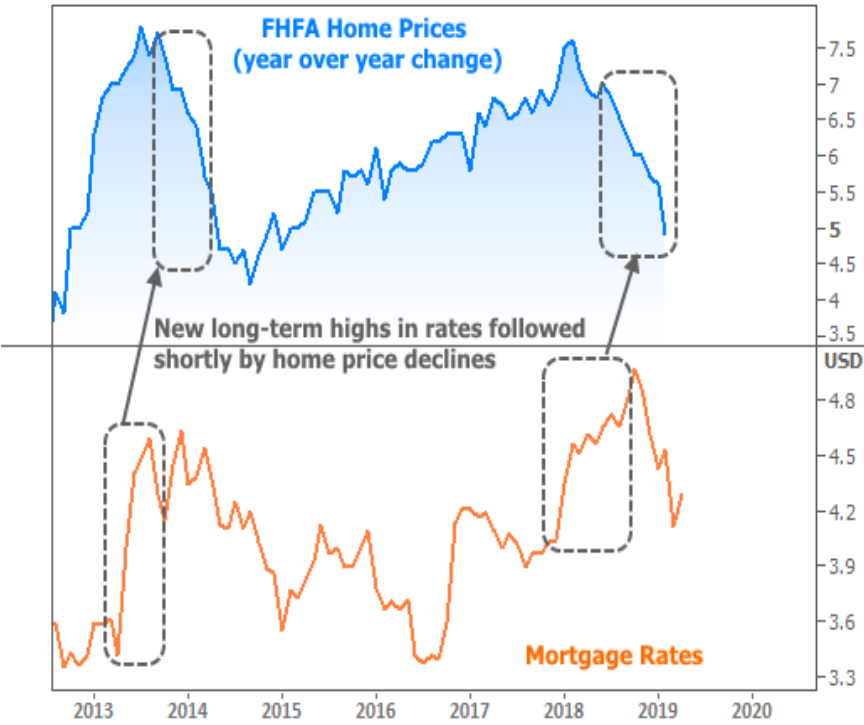

Recent Housing Data

		Value	Change
Mortgage Apps	Jun 12	208.5	+15.58%
Building Permits	Mar	1.46M	-3.95%
Housing Starts	Mar	1.32M	-13.15%
New Home Sales	Mar	693K	+4.68%
Pending Home Sales	Feb	75.6	+1.75%
Existing Home Sales	Feb	3.97M	-0.75%
Builder Confidence	Mar	51	+6.25%

Existing Home Sales

Rates vs Prices

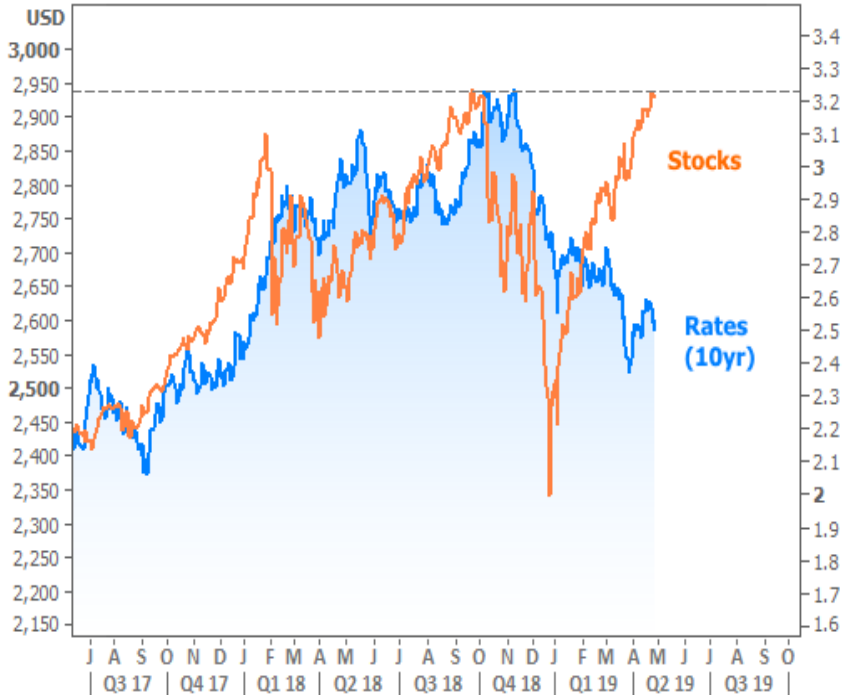

Rates surged to new long term highs in October and November due to ongoing improvement in US econ data among other things. At the same time, concerns were mounting about economic contractions in Europe and China. The following chart shows how debt yields (a proxy for economic momentum) were falling in those two economies while US yields were still rising.

US vs EU vs China

Eventually, the slump in foreign economies combined with a tough stance on rates from the Fed led US markets to follow suit. Stocks and rates **dropped abruptly** before the Fed stepped in and drastically softened its tone in January. That helped stocks recover and kept the good times rolling for rates (a softer tone from the Fed means rate hikes are less likely).

Rates vs Stocks

For several reasons, rates surged **even lower** by the end of March--so low that a correction was likely. It's **that** move higher in rates that we've been discussing for the past few weeks and it got even more interesting this week. Long story short, rates have been willing to recover a bit and hold their ground inside the new, lower range achieved in March. Until this week, it looked like they might be moving back into 2019's previous range.

US 10yr Yield

Throughout this volatile move, interest rates have been settling into a relationship with economic data. At times, it's been **too hot** (i.e. rates have been overly reactive) or **too cold** (i.e. rates haven't cared about some reports that normally matter). Recently, it's been **just right** (i.e. rates are paying close attention to the data, but the reactions have been tempered).

One reason for tempered reactions is that we haven't had a ton of important economic data in the past few weeks. But that all changes next week. Not only is the calendar packed on any given day, but the reports in question are typically the biggest market movers.

In and of itself, that would be enough reason to plan for potential volatility, but the data will also be joined by the Fed with a **new policy announcement** on Wednesday. Given how surprised markets were by the March 20th announcement, there's a decent chance of meaningful changes in next week's update.

Of course, the Fed **could** end up being interpreted as fairly neutral and the economic reports could be the right mix of stronger and weaker such that rates don't end up too far from current levels. But if the data is **unified** in its message, and **especially** if the Fed's message is in the same vein, it would likely result in the **biggest move in rates** in more than a month, for better (in the case of a friendly Fed and weak economic data) or worse (in the case of a hawkish Fed and strong data).

After Wednesday, all eyes will be Friday's big data combo with the jobs report 830am ET (Non-farm payrolls) and ISM's Non-Manufacturing index at 10am.

Real Talk

At The Rate Shop, we're not your average mortgage banker. We specialize in bringing you ridiculously low interest rates that will make you wonder what the other guys are doing. In fact the ONLY objection we ever hear is "your rates sound too good to be true". Well they're not, and here is why...

After 15 years in the retail banking world I was frustrated with the high interest rates that came from that business model. As I looked around at all the bloated layers of management and their expensive salaries and the overhead of running a larger company (think rent costs, employee health and benefit costs, payroll taxes, and on and on) it dawned on me that I was a part of the problem, and the solution, for me at least, was so easy to see.

Start my own mortgage brokerage shop. No expensive executive salaries, no expensive building to pay rent at, no unnecessary employees and all the costs that are associated with that. What happens when you cut out all the fat? You can provide lower rates and lower closing costs. It's simple. Now here is the best part, you still get great service from a local Kansas City Lender. My mission is to let everyone know that low rates and great customer service are NOT mutually exclusive.

Thanks for coming along on this journey where Low Rates meet Great Service. The two do NOT have to be mutually exclusive. It's just a lie that the big box mortgage companies have been telling you for years. Don't believe me? Give me a call or shoot me a text on my personal cell phone today and compare my rates and costs up against any other lender in the country, and be prepared to be blown away.

Mike Baker
