## Another Wild Week Leaves Rates at Long-Term Lows

Financial markets went on a **fairly wild ride** last week as downbeat manufacturing data combined with geopolitical news to lead a reversal in stocks and bonds. The current week brought just as much volatility by Thursday, but Friday took everyone by surprise--at least as far as rates were concerned.

Let's start by taking a look at the tamer side of the market. In the current case, that honor goes to stocks. Notice the initial spike in VIX (a stock-specific volatility gauge) in early May, which resulted from Trump's tariff announcement on Chinese imports. The next 2 weeks saw a barrage of trade-related headlines, but the news cycle was noticeably calming through the first half of last week. Then on May 23rd, **volatility returned** and stocks moved back to multi-month lows.

Volatility vs Stocks

The move in the bond market was even more pronounced. Whereas stocks surged down to the lowest levels since March, bond yields would have to look much farther back before finding similar levels. This makes good sense when we consider the major motivations for each side of the market.

## National Average Mortgage Rates

	Rate	Change	Points
<b>Mortgage News Daily</b>			
30 Yr. Fixed	7.07%	+0.02	0.00
15 Yr. Fixed	6.45%	0.00	0.00
30 Yr. FHA	6.51%	+0.02	0.00
30 Yr. Jumbo	7.26%	0.00	0.00
5/1 ARM	7.02%	-0.01	0.00

### Freddie Mac

30 Yr. Fixed	6.86%	-0.01	0.00
15 Yr. Fixed	6.16%	+0.03	0.00

Rates as of: 6/28

## Market Data

	Price / Yield	Change
MBS UMBS 5.5	98.49	-0.45
MBS GNMA 5.5	99.10	-0.44
10 YR Treasury	4.3961	-0.0019
30 YR Treasury	4.5659	+0.0019

Pricing as of: 7/1 2:47AM EST

## Recent Housing Data

		Value	Change
Mortgage Apps	Jun 12	208.5	+15.58%
Building Permits	Mar	1.46M	-3.95%
Housing Starts	Mar	1.32M	-13.15%
New Home Sales	Mar	693K	+4.68%
Pending Home Sales	Feb	75.6	+1.75%
Existing Home Sales	Feb	3.97M	-0.75%
Builder Confidence	Mar	51	+6.25%

Looking at the most basic themes since late 2018, we can divide stock/bond movement into a few sections (as broken out below). In late 2018, stocks began to swoon due to high rates, a seeming lack of concern from the Fed, and a weaker global growth outlook. The Fed changed its tune in early 2019, which benefited **both** stocks and bonds. It was only after the early May Trump tweets that stocks reversed course and began falling. Simply put, a friendly Fed and a weak economic outlook is a mixed bag for stocks, but it's all good for bonds/rates.

And the market is definitely expecting the Fed to be **increasingly friendly**. Those expectations increased sharply on Thursday night when another round of Trump tweets announced new tariffs on Mexican imports. All told, the trade war narrative can be credited for investors expecting **almost 2 additional Fed rate cuts** compared to early May. Those rate expectations go hand in hand with interest rate momentum.

Rates vs Fed Rate Hike Expectations

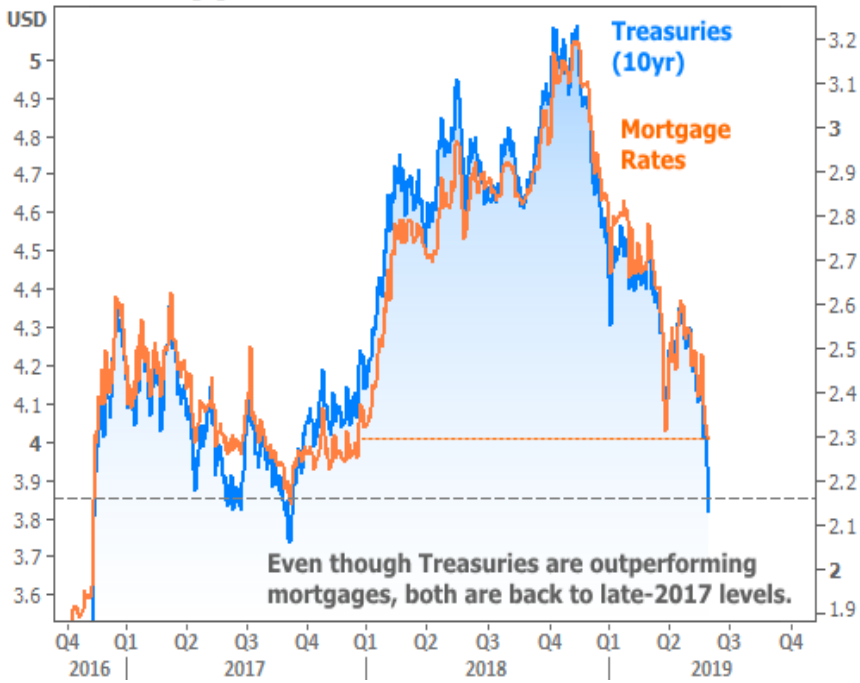

But how well are US Treasuries correlating with mortgage rates these days? The two are normally very well connected, but there's been quite a divergence recently.

Treasuries vs Mortgage Rates

This has been happening for several fairly complicated reasons (e.g. the speed of recent mortgage payoffs had a big negative effect on mortgage bond valuations. Market volatility spiked at the same time, which only further damaged valuations). Don't worry about that esoteric stuff though. The important thing is that the divergence will likely be temporary. Even then, mortgage rates were **still** able to make it back to the **lowest** levels since late 2017 this week, with top tier 30yr fixed rates officially moving just under 4%!

Treasuries vs Mortgage Rates

**Can the good times keep rolling?** That depends on Trump's willingness to continue driving hard bargains at the trade negotiation table. At the very least, unless there's a surprisingly optimistic announcement in the meantime, the possibility of significant progress is likely on hold until the G20 Summit in late June. That means the fate of rates may fall back in the hands of economic data. With that in mind, next week is packed with several of the most important reports we see in any given month. Adding to the volatile potential is a policy announcement and press conference from the European Central Bank on Thursday morning.

## Real Talk

At The Rate Shop, we're not your average mortgage banker. We specialize in bringing you ridiculously low interest rates that will make you wonder what the other guys are doing. In fact the ONLY objection we ever hear is "your rates sound too good to be true". Well they're not, and here is why...

After 15 years in the retail banking world I was frustrated with the high interest rates that came from that business model. As I looked around at all the bloated layers of management and their expensive salaries and the overhead of running a larger company (think rent costs, employee health and benefit costs, payroll taxes, and on and on) it dawned on me that I was a part of the problem, and the solution, for me at least, was so easy to see.

Start my own mortgage brokerage shop. No expensive executive salaries, no expensive building to pay rent at, no unnecessary employees and all the costs that are associated with that. What happens when you cut out all the fat? You can provide lower rates and lower closing costs. It's simple. Now here is the best part, you still get great service from a local Kansas City Lender. My mission is to let everyone know that low rates and great customer service are NOT mutually exclusive.

Thanks for coming along on this journey where Low Rates meet Great Service. The two do NOT have to be mutually exclusive. It's just a lie that the big box mortgage companies have been telling you for years. Don't believe me? Give me a call or shoot me a text on my personal cell phone today and compare my rates and costs up against any other lender in the country, and be prepared to be blown away.

**Mike Baker**
