Jobs Report Fires Warning Shot For Rates

Interest rates have been on a tear. They've fallen faster and farther than at any other time in the past 8 years. By some measures, they've managed to maintain positive momentum for as long as they ever do. This naturally begs the question: is it time for a bounce?

Investors expected some clarity on that question from this week's economic data. This was the first look at several of the **most important** reports since the last Fed meeting. At that meeting, the Fed acknowledged investor expectations for rate cuts in 2019, but on the condition of lackluster economic data.

In that regard, this week provided some **massively mixed messages**. At first, it looked like the data would indeed endorse a continuation of the trend toward even lower rates. The Institute for Supply Management (ISM) released its Purchasing Managers Indices (PMIs) for the manufacturing and non-manufacturing sectors on Monday and Wednesday respectively. Although they weren't very far from forecasts, both qualified as lackluster as they did nothing to challenge the notion that we're in one of the weaker patches of the economic cycle.

Manufacturing Index

National Average Mortgage Rates

| | Rate | Change | Points |
|----------------------------|-------|--------|--------|
| Mortgage News Daily | | | |
| 30 Yr. Fixed | 7.07% | +0.02 | 0.00 |
| 15 Yr. Fixed | 6.45% | 0.00 | 0.00 |
| 30 Yr. FHA | 6.51% | +0.02 | 0.00 |
| 30 Yr. Jumbo | 7.26% | 0.00 | 0.00 |
| 5/1 ARM | 7.02% | -0.01 | 0.00 |

Freddie Mac

| | | | |
|--------------|-------|-------|------|
| 30 Yr. Fixed | 6.86% | -0.01 | 0.00 |
| 15 Yr. Fixed | 6.16% | +0.03 | 0.00 |

Rates as of: 6/28

Market Data

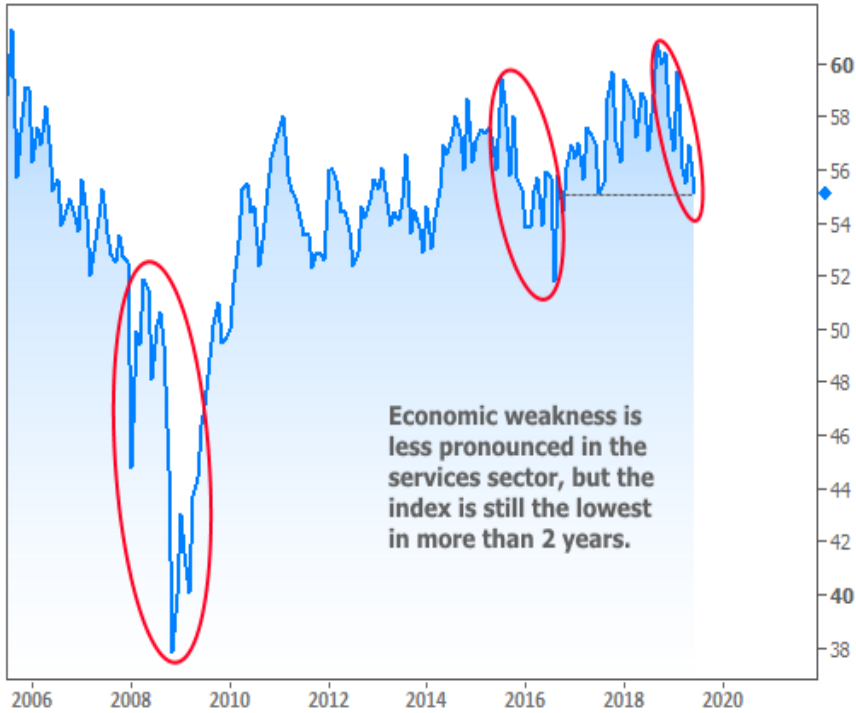

| | Price / Yield | Change |
|----------------|---------------|---------|
| MBS UMBS 5.5 | 98.49 | -0.45 |
| MBS GNMA 5.5 | 99.10 | -0.44 |
| 10 YR Treasury | 4.3971 | -0.0009 |
| 30 YR Treasury | 4.5659 | +0.0019 |

Recent Housing Data

| | Value | Change |
|---------------------|--------------|---------|
| Mortgage Apps | Jun 12 208.5 | +15.58% |
| Building Permits | Mar 1.46M | -3.95% |
| Housing Starts | Mar 1.32M | -13.15% |
| New Home Sales | Mar 693K | +4.68% |
| Pending Home Sales | Feb 75.6 | +1.75% |
| Existing Home Sales | Feb 3.97M | -0.75% |
| Builder Confidence | Mar 51 | +6.25% |

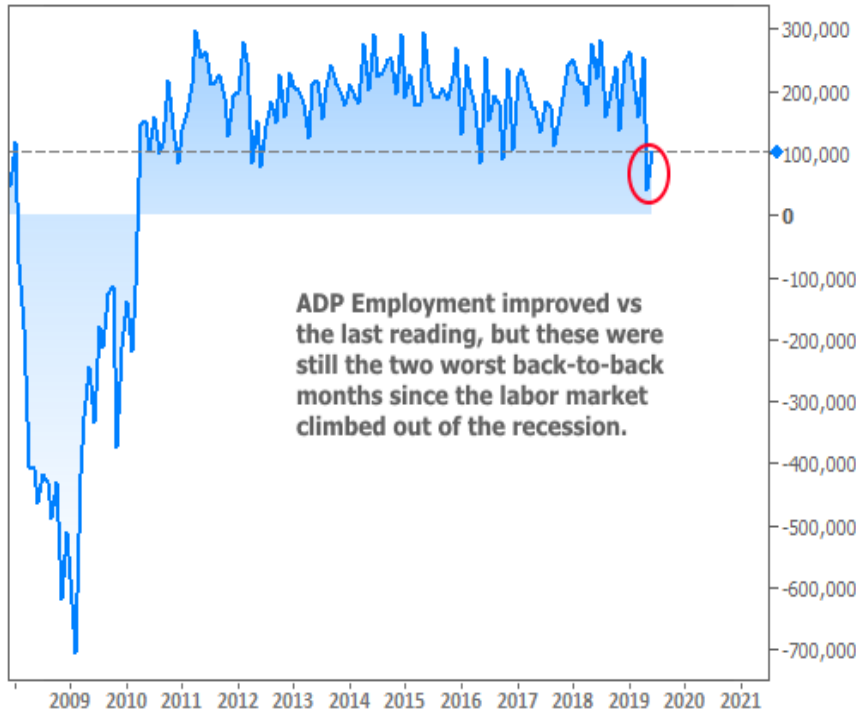

Non-Manufacturing Index

ISM PMIs are two of the most important monthly economic reports in terms of the ability to influence interest rates. They're second only the Employment Situation (aka "the jobs report" or "NFP" for its headline component: nonfarm payrolls) and occasionally the ADP Employment Report, which can be used as an early indicator for NFP.

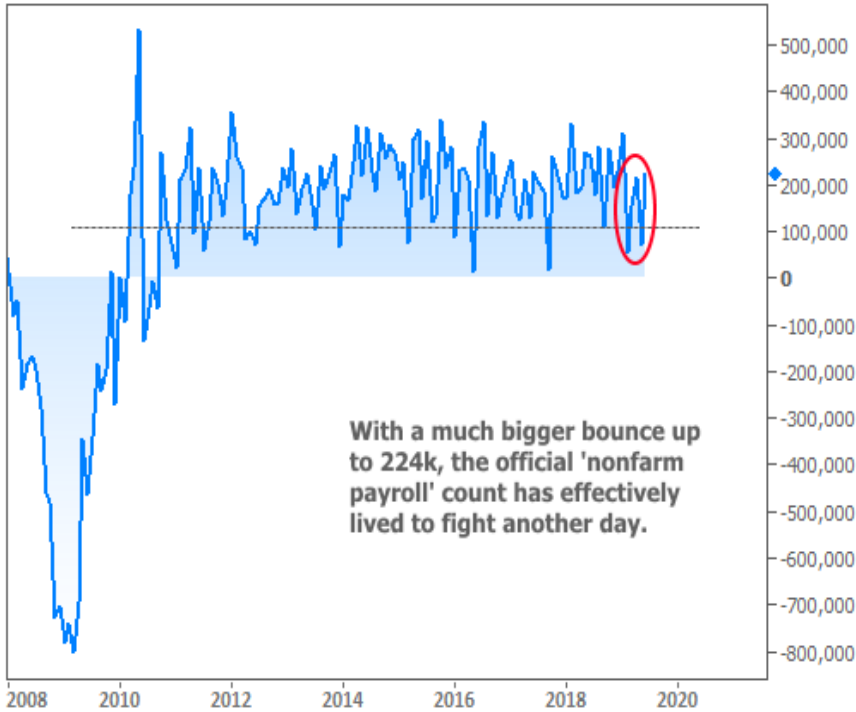

ADP and NFP were more closely watched than normal this week because both were quite a bit lower than normal last time around. ADP was first up on Wednesday. While it didn't convey quite as much weakness as last time, it was weak enough to keep rates **at long-term lows** (and to keep anticipation running high for Friday's NFP number).

ADP Employment

NFP also bounced back, but in **much grander fashion** than ADP, coming in at 224k compared to 72k last month--handily beating the median forecast of 160k.

Nonfarm Payrolls

Whereas Wednesday's data helped rates to break below the recent trend of "higher lows" (lower red line in the following chart), Friday's jobs data completely reversed those gains.

10yr Treasury Yield

At first glance, that may **look** like defeat for fans of low rates. Indeed, that may prove to be the case in the coming days. But Friday's rate spike stalled out at a level that leaves **some room for hope**. In terms of the 10yr Treasury yield (the best benchmark for momentum in long-term rates like mortgages), rates bounced perfectly on the ceiling that's been intact since the June 19th Fed meeting.

All that to say that although the jobs report **raises doubts** as to just how eager the Fed should be to cut rates, investors aren't giving up on the idea easily. That makes good sense considering the economic picture is too complex for a single economic report to adequately capture. The jobs report may remove some apprehension about a shift in the labor market, but it doesn't magically erase weakness seen in other reports.

The most important repercussion of this week's data is for the Fed. Had NFP been weak, it would have been an easy call for the Fed to cut rates in their meeting at the end of July. Had the ISM and ADP data been as strong as NFP, leaving rates unchanged would have been a similarly easy call. As it stands, the implication is **somewhere in between**. We'll have a great sneak peek at the Fed's thought process in light of this data when Fed Chair Powell delivers his semi-annual congressional testimony on Tuesday and Wednesday next week.

Real Talk

At The Rate Shop, we're not your average mortgage banker. We specialize in bringing you ridiculously low interest rates that will make you wonder what the other guys are doing. In fact the ONLY objection we ever hear is "your rates sound too good to be true". Well they're not, and here is why...

After 15 years in the retail banking world I was frustrated with the high interest rates that came from that business model. As I looked around at all the bloated layers of management and their expensive salaries and the overhead of running a larger company (think rent costs, employee health and benefit costs, payroll taxes, and on and on) it dawned on me that I was a part of the problem, and the solution, for me at least, was so easy to see.

Start my own mortgage brokerage shop. No expensive executive salaries, no expensive building to pay rent at, no unnecessary employees and all the costs that are associated with that. What happens when you cut out all the fat? You can provide lower rates and lower closing costs. It's simple. Now here is the best part, you still get great service from a local Kansas City Lender. My mission is to let everyone know that low rates and great customer service are NOT mutually exclusive.

Thanks for coming along on this journey where Low Rates meet Great Service. The two do NOT have to be mutually exclusive. It's just a lie that the big box mortgage companies have been telling you for years. Don't believe me? Give me a call or shoot me a text on my personal cell phone today and compare my rates and costs up against any other lender in the country, and be prepared to be blown away.

Mike Baker
