## Big Inflation Scare, But Rates Remain Resilient

The 70's and 80's brought unforgettable economic lessons about inflation. Since then, certain market participants have been watching inflation like **hawks**, even when they didn't need to.

After the start of the pandemic, the massive amount of fiscal stimulus (covid relief bill) and monetary accommodation from the Fed (bond buying and rate cuts) had inflation hawks on **high alert**. Fed speakers have been consistent in their response: **yes**, inflation was likely to spike this spring for a variety of reasons, but it wouldn't necessarily be evidence of a sustainable shift.

Inflation can be measured in a few ways, but the most basic and most popular is via price indices published by the government. The **Consumer Price Index (CPI)** is one of the two dominant forces in that regard and this week brought a fresh update for the month of April.

While analysts agreed with the Fed's inflation warning, this week's **actual** CPI data eclipsed even the **most aggressive** forecasts, both in monthly and annual terms.

## National Average Mortgage Rates

	Rate	Change	Points
<b>Mortgage News Daily</b>			
30 Yr. Fixed	7.07%	<b>+0.02</b>	0.00
15 Yr. Fixed	6.45%	<b>0.00</b>	0.00
30 Yr. FHA	6.51%	<b>+0.02</b>	0.00
30 Yr. Jumbo	7.26%	<b>0.00</b>	0.00
5/1 ARM	7.02%	<b>-0.01</b>	0.00

<b>Freddie Mac</b>			
30 Yr. Fixed	6.86%	<b>-0.01</b>	0.00
15 Yr. Fixed	6.16%	<b>+0.03</b>	0.00

Rates as of: 6/28

## Market Data

	Price / Yield	Change
MBS UMBS 5.5	98.49	<b>-0.45</b>
MBS GNMA 5.5	99.10	<b>-0.44</b>

30 YR Treasury	4.5721	<b>+0.0081</b>

Pricing as of: 6/30 8:40PM EST

## Recent Housing Data

		Value	Change
Mortgage Apps	Jun 12	208.5	+15.58%
Building Permits	Mar	1.46M	-3.95%
Housing Starts	Mar	1.32M	-13.15%
New Home Sales	Mar	693K	+4.68%
Pending Home Sales	Feb	75.6	+1.75%
Existing Home Sales	Feb	3.97M	-0.75%
Builder Confidence	Mar	51	+6.25%

**What's so bad about inflation though?** After all, hasn't the Fed said they want inflation to remain a bit higher relative to their typical target?

Yes, the Fed is actually **trying** to keep inflation higher than normal because they argue it will foster a stronger economic recovery for a wider slice of society. Regardless of one's opinion on that complicated topic, everyone agrees that "**too much**" inflation is a **bad** thing.

One of the most relevant negative impacts of high inflation on the mortgage/housing market is that it puts upward pressure on rates.

Here's a **quick explainer** as to why:

Mortgage rates are primarily determined by trading in the bond market. Investors who buy bonds earn returns by collecting payments over time based on terms agreed to upfront. Inflation robs those payments of future purchasing power (I'm giving you \$100/month for 30 years, but what if a pack of gum costs \$100 in 30 years?). As such, if investors expect higher inflation, they adjust by charging higher rates today.

That scenario played out immediately in the bond market on Wednesday with 10yr Treasury yields spiking **abruptly** in the wake of the inflation report.

That looks fairly dramatic on the 5-day chart, but in the bigger picture, the bond market arguably took the inflation surprise in stride.

The 2nd half of the week was spent recovering back into the prevailing range with a weak Retail Sales report doing nothing to stand in the way. We'll stop short of giving the data credit for the rate recovery simply because this series remains exceptionally volatile. No one wants to read too much into another "rebound month" following last month's stimulus check effect.

Mortgage rates were logically **higher** on the week, even if multiple headlines suggested they were **lower**. Those headlines almost certainly cite Freddie Mac's weekly survey data. By the time the survey is released on Thursday, **it can be very stale** if rates experienced much volatility earlier in the week.

Next week brings a **slew of housing-related reports** with Builder Confidence leading off on Monday. Residential construction numbers follow on Tuesday and the important Existing Home Sales report will be released on Friday. Analysts expect the housing data to hold fairly steady with last month's levels.

## Real Talk

At The Rate Shop, we're not your average mortgage banker. We specialize in bringing you ridiculously low interest rates that will make you wonder what the other guys are doing. In fact the ONLY objection we ever hear is "your rates sound too good to be true". Well they're not, and here is why...

After 15 years in the retail banking world I was frustrated with the high interest rates that came from that business model. As I looked around at all the bloated layers of management and their expensive salaries and the overhead of running a larger company (think rent costs, employee health and benefit costs, payroll taxes, and on and on) it dawned on me that I was a part of the problem, and the solution, for me at least, was so easy to see.

Start my own mortgage brokerage shop. No expensive executive salaries, no expensive building to pay rent at, no unnecessary employees and all the costs that are associated with that. What happens when you cut out all the fat? You can provide lower rates and lower closing costs. It's simple. Now here is the best part, you still get great service from a local Kansas City Lender. My mission is to let everyone know that low rates and great customer service are NOT mutually exclusive.

Thanks for coming along on this journey where Low Rates meet Great Service. The two do NOT have to be mutually exclusive. It's just a lie that the big box mortgage companies have been telling you for years. Don't believe me? Give me a call or shoot me a text on my personal cell phone today and compare my rates and costs up against any other lender in the country, and be prepared to be blown away.

Mike Baker
