Mortgage Rates Near 23 Year Highs. Is There Any Hope?

Interest rates of all types have been under immense pressure since the beginning of 2022. That's when the Fed began raising rates at the fastest pace in decades to the highest levels in decades in order to combat a similarly fast-paced spike in inflation.

National Average Mortgage Rates

	Rate	Change	Points
Mortgage News Daily			
30 Yr. Fixed	7.07%	+0.02	0.00
15 Yr. Fixed	6.45%	0.00	0.00
30 Yr. FHA	6.51%	+0.02	0.00
30 Yr. Jumbo	7.26%	0.00	0.00
5/1 ARM	7.02%	-0.01	0.00

Freddie Mac

30 Yr. Fixed	6.86%	-0.01	0.00
15 Yr. Fixed	6.16%	+0.03	0.00

Rates as of: 6/28

Market Data

	Price / Yield	Change
MBS UMBS 5.5	98.49	-0.45
MBS GNMA 5.5	99.10	-0.44
10 YR Treasury	4.3980	+0.1111
30 YR Treasury	4.5640	+0.1383

Pricing as of: 6/28 5:59PM EST

Recent Housing Data

		Value	Change
Mortgage Apps	Jun 12	208.5	+15.58%
Building Permits	Mar	1.46M	-3.95%
Housing Starts	Mar	1.32M	-13.15%
New Home Sales	Mar	693K	+4.68%
Pending Home Sales	Feb	75.6	+1.75%
Existing Home Sales	Feb	3.97M	-0.75%
Builder Confidence	Mar	51	+6.25%

This particular era of Fed rate hikes is particularly aggressive because the Fed got a late start in responding to price pressures. They argued that policies needed to remain accommodative for longer due to economic uncertainties surrounding covid. This is in stark contrast to the only comparable hyperinflation episodes starting in the late 70s. In the chart below, notice the orange line (Fed Funds Rate) moving higher sooner and bigger than inflation. The opposite is true of the present rate hike campaign.

The Fed Funds Rate doesn't directly dictate mortgage rates, but in general, tighter Fed policies put upward pressure on rates across the board. Mortgages are not immune.

As rates have risen, there have been several instances of relief and hope. These have occurred in part due to legitimate shifts in the data that suggested the worst might be over and in part due to the belief that things had moved too far, too fast to be sustained. In July and November 2022, it was economic data that helped. In March 2023, it was the bank failures. Each attempt has been thwarted with the most recent being the most gradual. It also represents the best example of the rate market coming to terms with a "higher for longer" reality that it didn't want to believe during the last two recovery attempts.

The net effect is that rates have been near their highest levels in 23 years for the longest stretch of time since the average 30yr fixed rate first crested 7% in November. NOTE: not every rate index is over 7%, but the following index accounts for upfront "points" that make other indices slightly lower. As always, the best way to use a mortgage rate index is to observe changes in relative terms. Actual rate quotes can vary widely for a wide variety of reasons.

Is there any hope for relief? There's always hope. The only question is one of timing. Timing will depend on economic data and inflation, among other things. Markets got a glimpse of just that sort of relief on Friday following the big jobs report from the Labor Department. It was still very strong in a historical context, but not quite as strong as economists had predicted.

Up until then, rates were in a bit of a panic this week due to a confluence of other data and events. Wednesday saw the biggest jump after the ADP employment data and an announcement regarding the government's anticipated borrowing needs (via Treasuries).

U.S. Treasuries are at the core of the rate market. When investors become less interested in buying them or when the government becomes more interested in selling them, rates rise. The ADP data hit the demand side of the equation and the Treasury announcement hit the supply side. We can see how things played out in the following chart of 10yr Treasury yields as well as the much-needed response to Friday's more important jobs report.

Despite Friday's recovery, current rate levels are still uncomfortably close to long-term highs. It merely served to show us how "hope" can work. In order to see more of it, we'll need more data to make similar suggestions.

So what's the next big economic report to watch? Easy! The Consumer Price Index (CPI) on Thursday, August 10th. CPI is the only other piece of scheduled monthly economic data that could compete with the jobs report over the past 2 years when it comes to impact on rates. The last CPI report was good for rates, but the market needs to see a pattern that's repeated for several consecutive months. If inflation is lower than expected this time around, it would be a solid step in that direction, one that likely allows rates to continue to moderate after this week's push toward long-term highs.

Real Talk

At The Rate Shop, we're not your average mortgage banker. We specialize in bringing you ridiculously low interest rates that will make you wonder what the other guys are doing. In fact the ONLY objection we ever hear is "your rates sound too good to be true". Well they're not, and here is why...

After 15 years in the retail banking world I was frustrated with the high interest rates that came from that business model. As I looked around at all the bloated layers of management and their expensive salaries and the overhead of running a larger company (think rent costs, employee health and benefit costs, payroll taxes, and on and on) it dawned on me that I was a part of the problem, and the solution, for me at least, was so easy to see.

Start my own mortgage brokerage shop. No expensive executive salaries, no expensive building to pay rent at, no unnecessary employees and all the costs that are associated with that. What happens when you cut out all the fat? You can provide lower rates and lower closing costs. It's simple. Now here is the best part, you still get great service from a local Kansas City Lender. My mission is to let everyone know that low rates and great customer service are NOT mutually exclusive.

Thanks for coming along on this journey where Low Rates meet Great Service. The two do NOT have to be mutually exclusive. It's just a lie that the big box mortgage companies have been telling you for years. Don't believe me? Give me a call or shoot me a text on my personal cell phone today and compare my rates and costs up against any other lender in the country, and be prepared to be blown away.

Mike Baker
