Highest Mortgage Rates in More Than a Month, But There Are Silver Linings

So far, 2024 has been distinctly different from the end of 2023. November and December saw rates move lower at one of the fastest paces in decades. In contrast, January has delivered a fairly consistent uptrend with the average lender now at the highest levels in more than a month.

Frustratingly, widespread media coverage suggested rates fell to their lowest levels since May this week. Rest assured, this is NOT the case. It wasn't even the case last week, although that the claim would have been less frivolous last week.

The source of the confusion is Freddie Mac's weekly survey which is the longest-running and most widely cited mortgage rate index overall. While there are a few reasons that it doesn't always line up perfectly with reality, the biggest issue is really the lag effect resulting from the survey's timing and methodology.

Freddie takes an average of rate quotes on Thursday through Wednesday and reports that a day later. In other words, Thursday January 11th through Wednesday January 17th is this week's survey time frame. The 11th and 12th were the two best days of the past 2 weeks. They dragged the average down. Thursday and Friday of the current week have seen the highest rates in more than a month. They are NOT included in Freddie's survey.

Here's a comparison between the Freddie survey rate and the more timely MND daily index. As always, the best way to use a chart like this is to compare the movement in the lines, because outright rates themselves can be affected by multiple factors.

National Average Mortgage Rates

	Rate	Change	Points
Mortgage News Daily			
30 Yr. Fixed	7.07%	+0.02	0.00
15 Yr. Fixed	6.45%	0.00	0.00
30 Yr. FHA	6.51%	+0.02	0.00
30 Yr. Jumbo	7.26%	0.00	0.00
5/1 ARM	7.02%	-0.01	0.00

Freddie Mac

30 Yr. Fixed	6.86%	-0.01	0.00
15 Yr. Fixed	6.16%	+0.03	0.00

Rates as of: 6/28

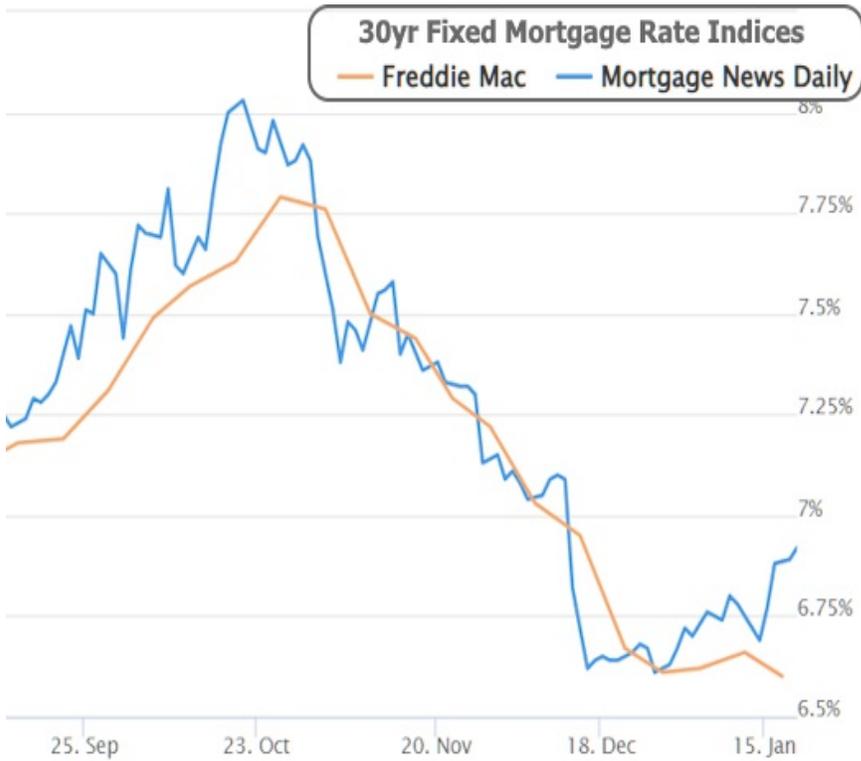

Market Data

	Price / Yield	Change
MBS UMBS 5.5	98.49	-0.45
MBS GNMA 5.5	99.10	-0.44
10 YR Treasury	4.3980	+0.1111
30 YR Treasury	4.5640	+0.1383

Pricing as of: 6/28 5:59PM EST

Recent Housing Data

		Value	Change
Mortgage Apps	Jun 12	208.5	+15.58%
Building Permits	Mar	1.46M	-3.95%
Housing Starts	Mar	1.32M	-13.15%
New Home Sales	Mar	693K	+4.68%
Pending Home Sales	Feb	75.6	+1.75%
Existing Home Sales	Feb	3.97M	-0.75%
Builder Confidence	Mar	51	+6.25%

Bottom line on rates: they really are at the highest levels in more than a month!

The silver lining is that rates are still more than a percent lower than they were at the most recent highs back in October. The bond market is experiencing a bit of a correction after the fast-paced improvements at the end of 2023. It has been gentle so far, especially considering that we haven't seen any economic data that makes a strong case for additional gains.

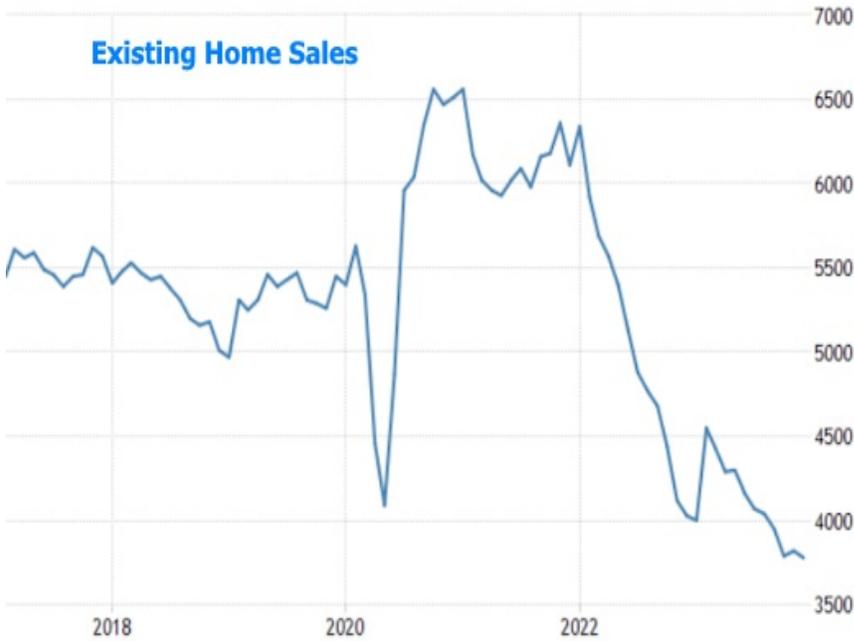

There are a few silver linings in the housing data as well, but mostly for new homes and construction. NAHB reported a decent uptick in builder sentiment via its Housing Market Index (HMI).

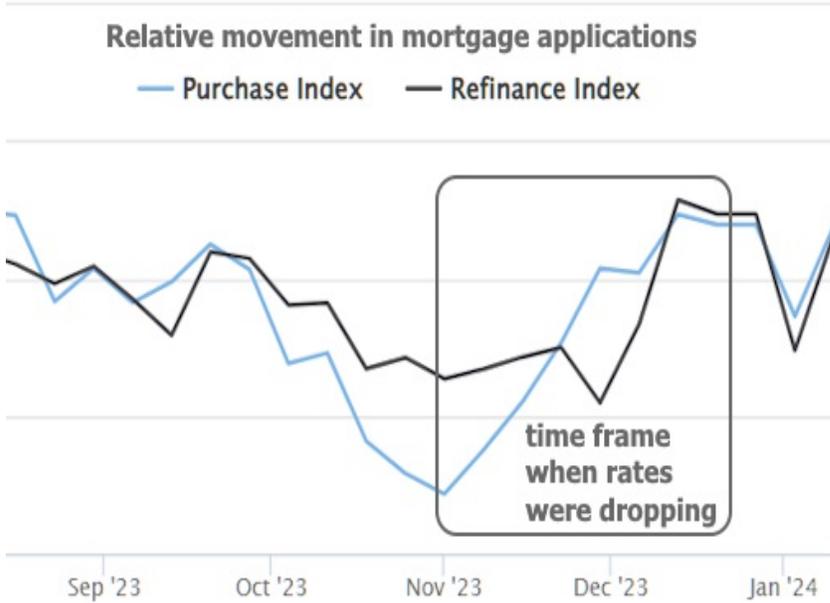

Construction and new homes continue to carry a bigger-than-normal share of housing market activity. This week's release of December building permit data shows more of the same slow, steady grind.

Contrast that to Existing Home Sales (also reported this week for the month of December) which came in at the lowest levels since 2010.

At the very least, the housing market is showing signs that it's receptive to the recent improvement in rates. This is best seen in more timely data series like mortgage applications, where both refi and purchase apps moved back up this week.

In the week ahead, we'll get additional housing market data in the form of New Home Sales on Thursday and Pending Home Sales on Friday. While this may be interesting to the housing market, it's not the data the Fed is most concerned with when it comes to calibrating the trajectory of the Fed Funds Rate in 2024. Unfortunately, we won't get any such reports before the next Fed announcement on January 31st. Rate volatility could increase quickly after that with the following week bringing several important reports.

It's important to separate hope from reality when considering rates in 2024. Yes, there has been a huge recovery since October, but it would not have been as big had it not begun from the highest levels in decades. Yes, it is entirely possible that rates could move quite a bit lower this year, but that won't happen if economic growth and inflation manage to stay elevated. It's been said so many times in the past year, but it bears repeating: the path of rates really is "data dependent," and if it seems like all we do anymore is wait for the biggest pieces of data to find out what the next big move will be, that's because that's the way it is!

Real Talk

At The Rate Shop, we're not your average mortgage banker. We specialize in bringing you ridiculously low interest rates that will make you wonder what the other guys are doing. In fact the ONLY objection we ever hear is "your rates sound too good to be true". Well they're not, and here is why...

After 15 years in the retail banking world I was frustrated with the high interest rates that came from that business model. As I looked around at all the bloated layers of management and their expensive salaries and the overhead of running a larger company (think rent costs, employee health and benefit costs, payroll taxes, and on and on) it dawned on me that I was a part of the problem, and the solution, for me at least, was so easy to see.

Start my own mortgage brokerage shop. No expensive executive salaries, no expensive building to pay rent at, no unnecessary employees and all the costs that are associated with that. What happens when you cut out all the fat? You can provide lower rates and lower closing costs. It's simple. Now here is the best part, you still get great service from a local Kansas City Lender. My mission is to let everyone know that low rates and great customer service are NOT mutually exclusive.

Thanks for coming along on this journey where Low Rates meet Great Service. The two do NOT have to be mutually exclusive. It's just a lie that the big box mortgage companies have been telling you for years. Don't believe me? Give me a call or shoot me a text on my personal cell phone today and compare my rates and costs up against any other lender in the country, and be prepared to be blown away.

Mike Baker
