Despite Bigger Bumps, Fed Still Sees Path to Lower Rates

It was an action-packed week for the housing and mortgage market. Wednesday's Fed announcement was the highlight, but we also got several economic reports that caused rate volatility. Thankfully, it was mostly the good kind.

The week got off to a slightly stronger start with Monday's only major rate news being updated borrowing estimates from the Treasury Department. Why would such a thing matter?

Treasuries largely dictate day to day interest rate momentum in the U.S. because they are abundant, simple, and as close to risk-free as it gets. As such, Treasuries are the universal yardstick for all other debt in the U.S., including MBS, the mortgage-backed securities that have the most direct impact on mortgage rates. This is why Treasury yields and mortgage rates correlate so well over time.

National Average Mortgage Rates

	Rate	Change	Points
Mortgage News Daily			
30 Yr. Fixed	7.07%	+0.02	0.00
15 Yr. Fixed	6.45%	0.00	0.00
30 Yr. FHA	6.51%	+0.02	0.00
30 Yr. Jumbo	7.26%	0.00	0.00
5/1 ARM	7.02%	-0.01	0.00

Freddie Mac

30 Yr. Fixed	6.86%	-0.01	0.00
15 Yr. Fixed	6.16%	+0.03	0.00

Rates as of: 6/28

Market Data

	Price / Yield	Change
MBS UMBS 5.5	98.49	-0.45
MBS GNMA 5.5	99.10	-0.44
10 YR Treasury	4.3980	+0.1111
30 YR Treasury	4.5640	+0.1383

Pricing as of: 6/28 5:59PM EST

Recent Housing Data

		Value	Change
Mortgage Apps	Jun 12	208.5	+15.58%
Building Permits	Mar	1.46M	-3.95%
Housing Starts	Mar	1.32M	-13.15%
New Home Sales	Mar	693K	+4.68%
Pending Home Sales	Feb	75.6	+1.75%
Existing Home Sales	Feb	3.97M	-0.75%
Builder Confidence	Mar	51	+6.25%

Treasuries can take cues from several sources. One of the biggest is the change in the outright level of supply. In other words, how much more debt is the U.S. government issuing in the upcoming quarter? If that number is higher than expected, it puts upward pressure on rates. Monday's news from Treasury was fairly palatable and roughly in line with market expectations, which allowed rates to stay steady.

Things changed on Tuesday when the Employment Cost Index (ECI) data came out. This is one of several reports that the Fed has mentioned as being important to the rate outlook recently. Higher numbers mean higher rates, all other things being equal. This week's installment showed Q1 costs at 1.2, up from 0.9 in Q4 and well above the market consensus of 1.0. Rates hit the highest levels of the week as a result, both in terms of Treasury yields and mortgage rates.

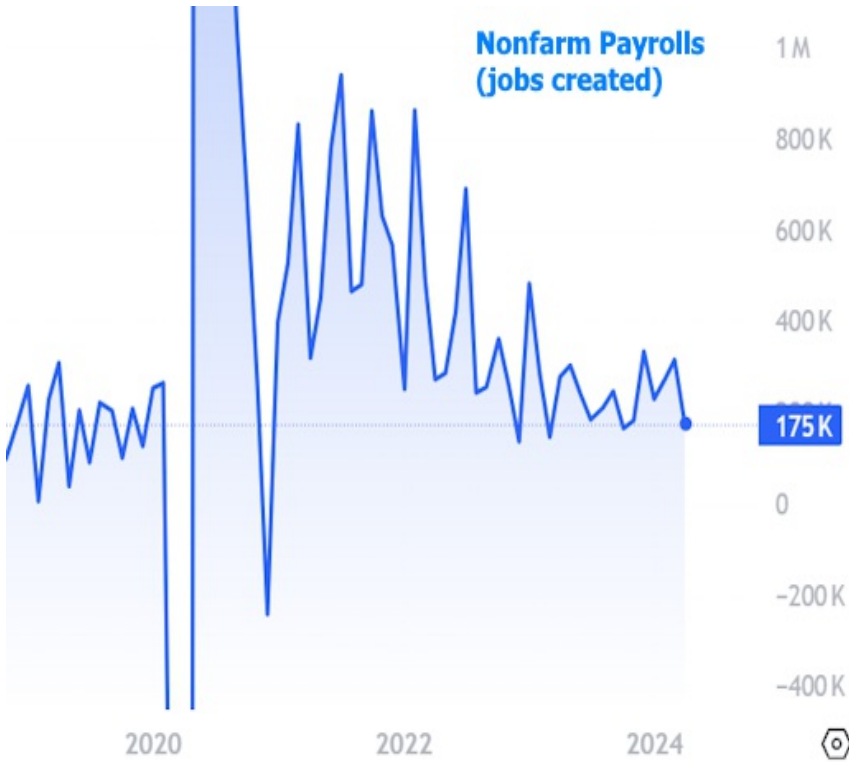

Things changed on Wednesday. The morning economic data did no harm, but didn't necessarily deserve much credit for turning things around. Those honors went to the Fed Announcement in the afternoon--specifically: Fed Chair Powell's press conference.

Markets already knew the Fed wouldn't change rates at this meeting, so the focus was likely to be on Powell anyway. Expectations were more varied as to how he might address the recent inflation data, but we knew he'd have to be less convinced than last time when it comes to 2024 rate cut prospects.

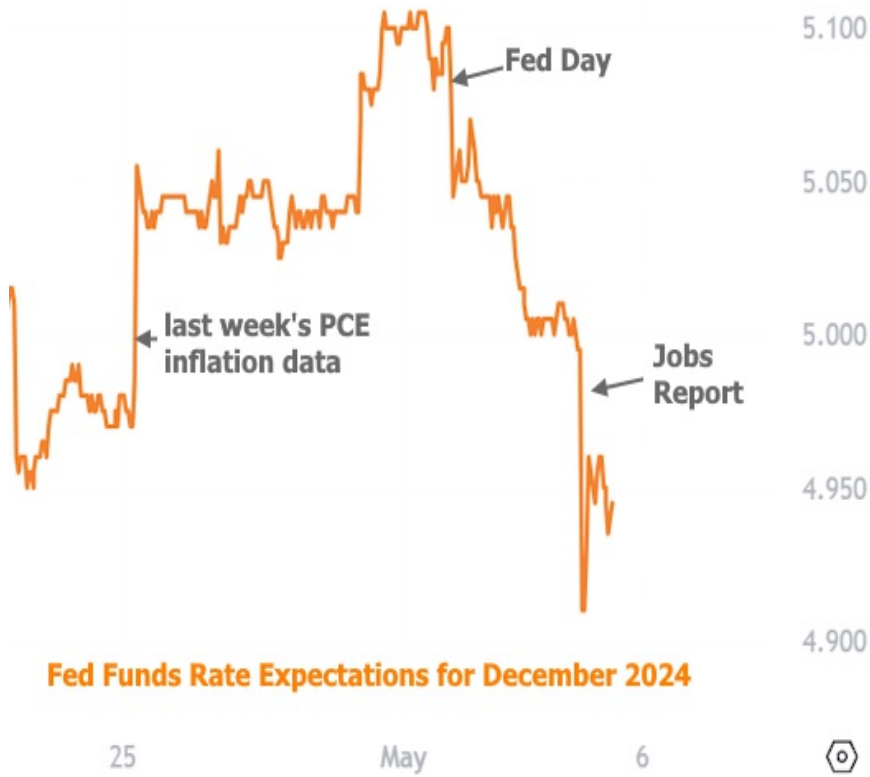

Unsurprisingly, Powell acknowledged that what had looked like one month of noise earlier in the year was now an undeniable and unwelcome shift in progress toward lower inflation. Nonetheless, he expects progress to get back on track in the coming months and for the Fed's next move to be a cut instead of a hike.

Markets also appreciated his clarification on political matters. Many analysts have suggested the Fed won't be able to cut rates until December because it risks looking like a political move if it happens before November's election. But Powell was clear in saying the Fed would take whatever monetary policy action it deemed appropriate whenever the data suggested it. In other words, if inflation were to begin falling in a more meaningful way in the next several months and if the economy began to falter, we would not have to wait several more months for the Fed to deliver some rate relief.

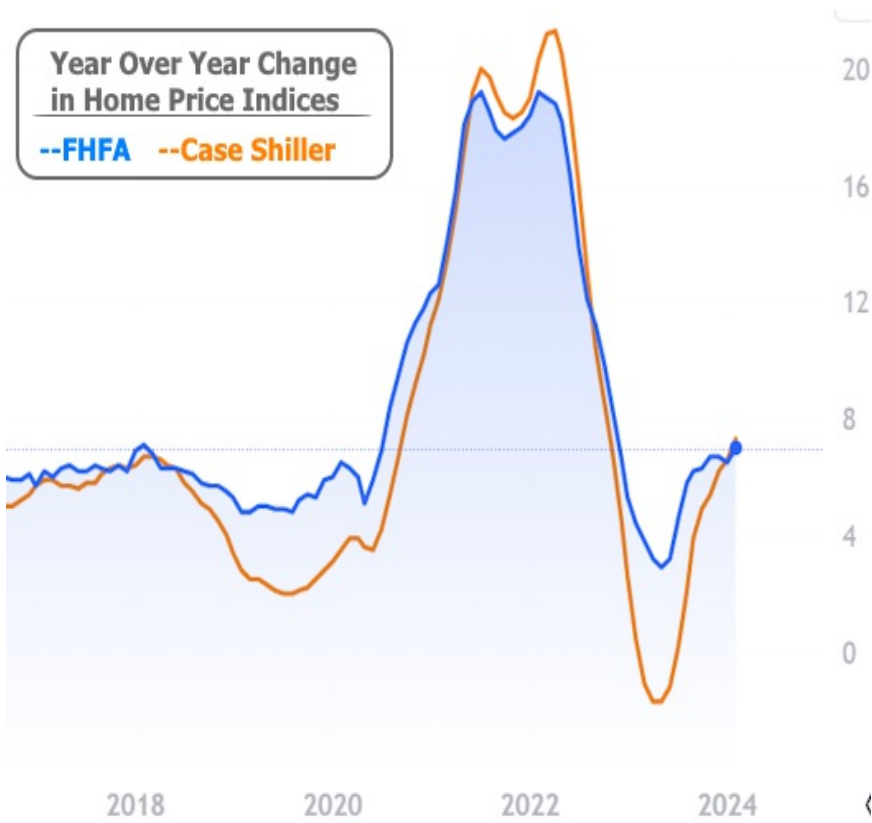

With that, momentum had shifted in favor of lower rates for the week. There was some follow-through on Thursday, but even better gains on Friday after the latest monthly jobs report came out weaker than expected. Job creation fell to its lowest level since October, and that's in line with the lowest since covid lockdowns. It was also well below the forecast consensus (175k versus 243k).

Historically, 175k is a solid number, but everything's relative. Rates typically fall when the job count undershoots the forecast by that much and Friday was no exception. 10yr Treasury yields and mortgage rates ended the week at the lowest levels since April 9th. Traders further lowered their outlook for the end-of-year Fed Funds Rate, once again pricing in at least one full cut this year.

On the housing data front, the week's most notable releases were the two leading national price indices from FHFA and Case Shiller. Both were much higher than forecast for the month of February, showing annual growth of 7.0% and 7.3% respectively.

From here, the calendar is comparatively much more quiet until the biggest economic report of the month on May 15: the Consumer Price Index (CPI). This is the broad inflation index that has been at the scene of many crimes against the world of interest rates. Reactions have been big enough that it's not uncommon to see rate momentum fizzle sideways as traders wait for the next inflationary shoe to drop.

Real Talk

At The Rate Shop, we're not your average mortgage banker. We specialize in bringing you ridiculously low interest rates that will make you wonder what the other guys are doing. In fact the ONLY objection we ever hear is "your rates sound too good to be true". Well they're not, and here is why...

After 15 years in the retail banking world I was frustrated with the high interest rates that came from that business model. As I looked around at all the bloated layers of management and their expensive salaries and the overhead of running a larger company (think rent costs, employee health and benefit costs, payroll taxes, and on and on) it dawned on me that I was a part of the problem, and the solution, for me at least, was so easy to see.

Start my own mortgage brokerage shop. No expensive executive salaries, no expensive building to pay rent at, no unnecessary employees and all the costs that are associated with that. What happens when you cut out all the fat? You can provide lower rates and lower closing costs. It's simple. Now here is the best part, you still get great service from a local Kansas City Lender. My mission is to let everyone know that low rates and great customer service are NOT mutually exclusive.

Thanks for coming along on this journey where Low Rates meet Great Service. The two do NOT have to be mutually exclusive. It's just a lie that the big box mortgage companies have been telling you for years. Don't believe me? Give me a call or shoot me a text on my personal cell phone today and compare my rates and costs up against any other lender in the country, and be prepared to be blown away.

Mike Baker
