Wildest Week For Mortgage Rates, Ever (Seriously)

The headline makes a lofty claim, but let's put doubt to rest with 3 facts right up front.

1. Mortgage rates were at all time lows on Monday Morning for most lenders
2. By Friday, rates had risen as fast as they've **ever** risen in one week
3. By Friday, the gap between mortgages and Treasury yields was the widest on record.

When we have things happening in other markets such as all-time low 10yr Treasury yields (Monday) or the biggest-ever single day loss in stocks (several times, depending on the index), it's not hard to imagine that big things are happening elsewhere in financial markets.

What's causing all this? In a word: Coronavirus. The stock market reaction is well-documented, but the record rally in rates is just as impressive.

National Average Mortgage Rates

	Rate	Change	Points
--	------	--------	--------

Mortgage News Daily

30 Yr. Fixed	7.07%	+0.02	0.00
15 Yr. Fixed	6.45%	0.00	0.00
30 Yr. FHA	6.51%	+0.02	0.00
30 Yr. Jumbo	7.26%	0.00	0.00
5/1 ARM	7.02%	-0.01	0.00

Freddie Mac

30 Yr. Fixed	6.86%	-0.01	0.00
15 Yr. Fixed	6.16%	+0.03	0.00

Rates as of: 6/28

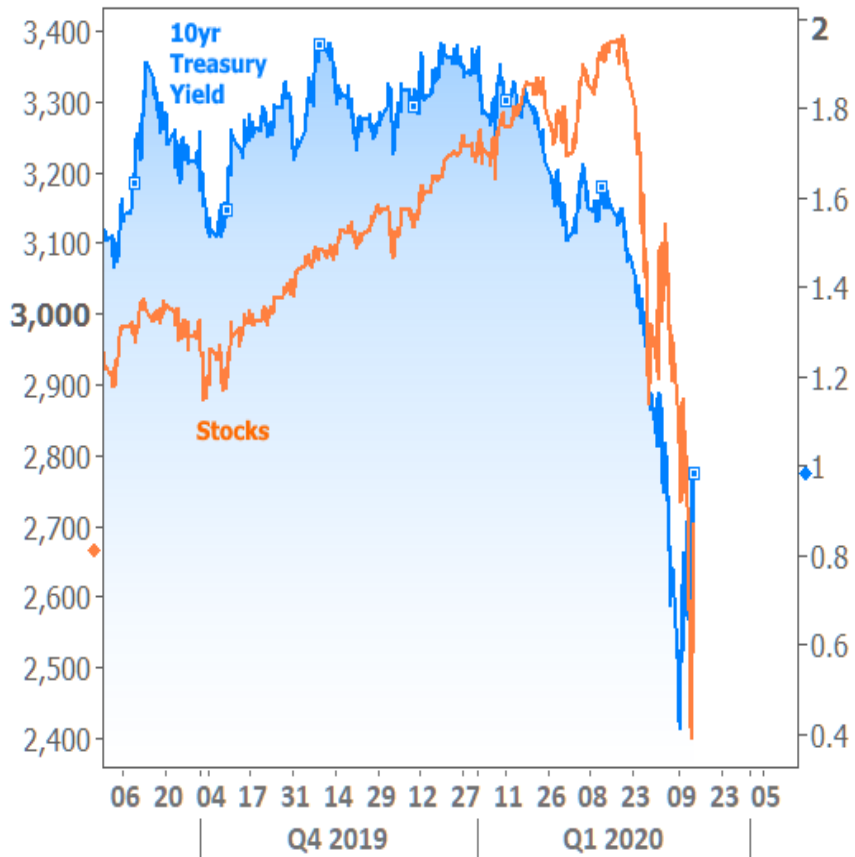

Market Data

	Price / Yield	Change
MBS UMBS 5.5	98.49	-0.45
MBS GNMA 5.5	99.10	-0.44
10 YR Treasury	4.3902	-0.0078
30 YR Treasury	4.5568	-0.0072

Pricing as of: 7/1 12:51AM EST

Recent Housing Data

		Value	Change
Mortgage Apps	Jun 12	208.5	+15.58%
Building Permits	Mar	1.46M	-3.95%
Housing Starts	Mar	1.32M	-13.15%

Pending Home Sales	Feb	75.6	+1.75%
Existing Home Sales	Feb	3.97M	-0.75%
Builder Confidence	Mar	51	+6.25%

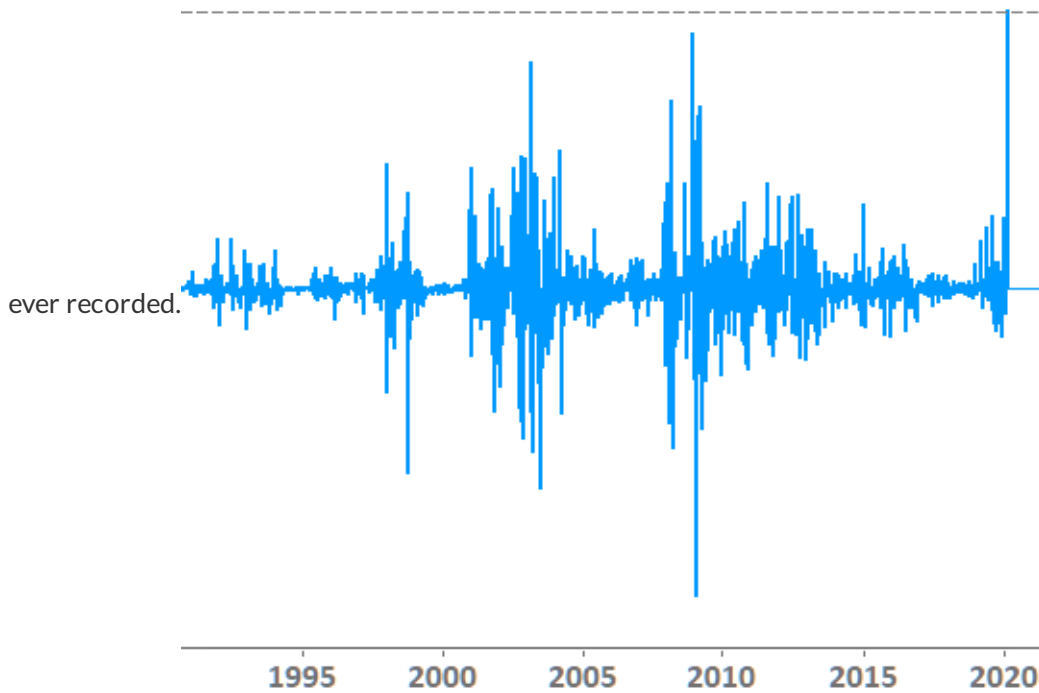

In the interest of keeping this short and sweet, here are the previous newsletters that have covered the unfolding market drama:

- [2020 Refi Boom Surpasses 2016's And It's Still Growing](#)
- [Why Can't Mortgage Rates Keep Up With Record Low Treasury Yields?](#)
- [Mortgage Market in Chaos. What You Need To Know](#)

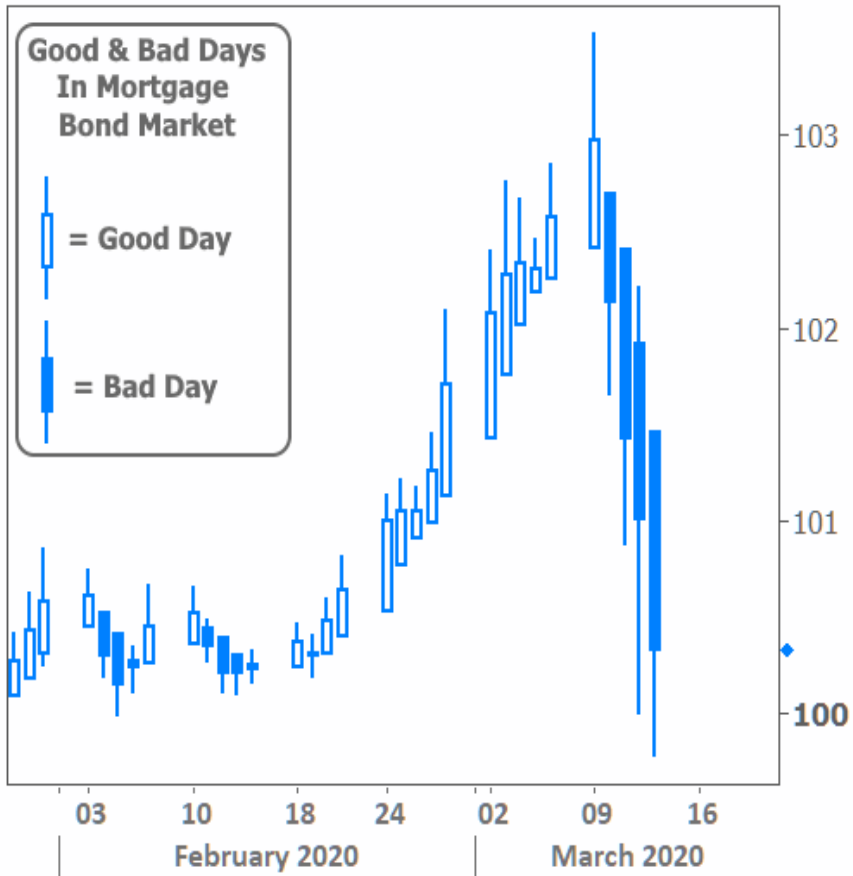

While coronavirus dominated the headlines, massive drama was unfolding in the mortgage market. All-time low mortgage rates were already in place by March 2nd. Refinance demand was already spiking, but the subsequent jump was the biggest

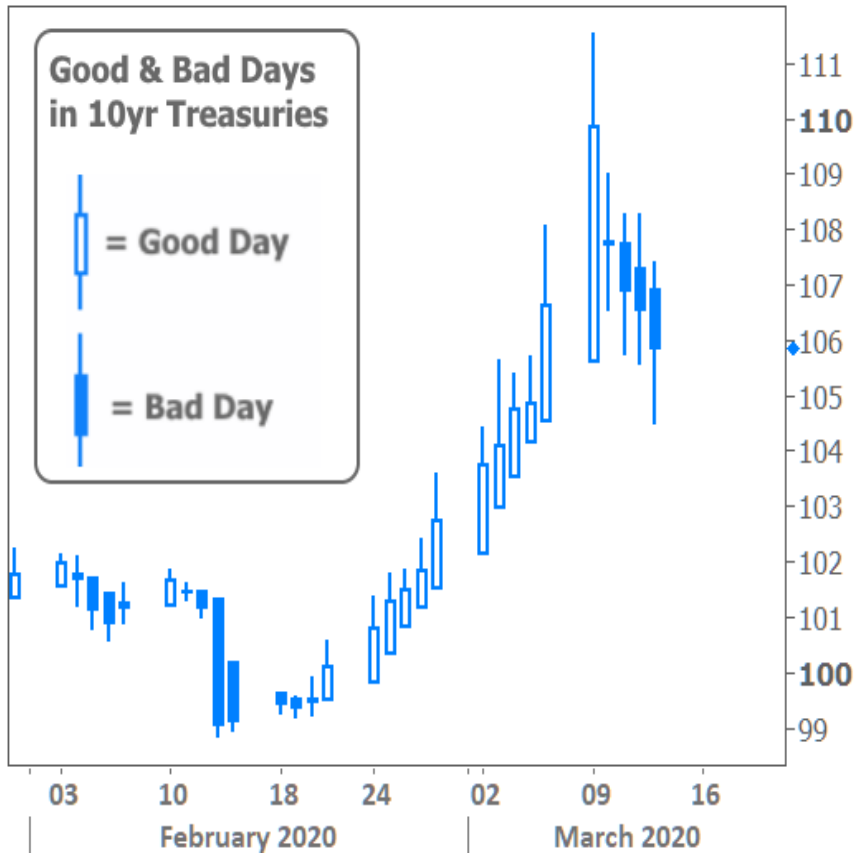

week-over-week change in refinance mortgage apps

In financial markets, unprecedented opportunity often comes with unprecedented consequences. In this case, the glut of refi demand was so overwhelming that mortgage lenders couldn't move loans off their books quick enough to keep up with demand for new loans. The demand could only be created by selling the loans to investors at lower and lower prices.

When investors pay less for mortgages, rates move higher. In the chart below, each candlestick represents 1 day of price movement in this market for loans sold to investors (mortgage-backed securities or MBS).

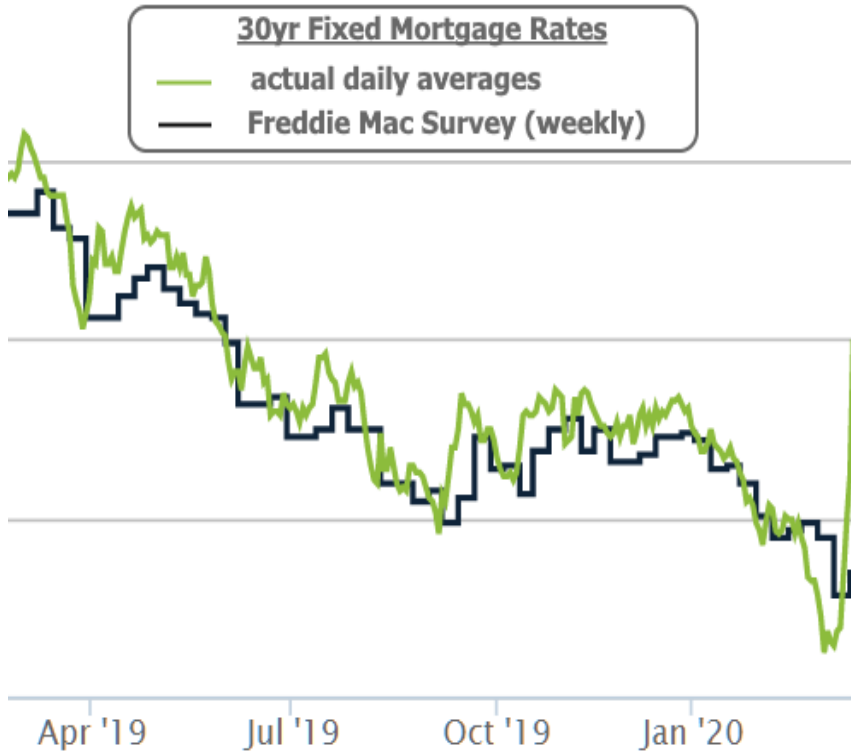

Funding issues compounded the problem as some lenders completely exhausted their own sources of financing. In other words, many lenders borrow money with short-term loans in order to originate more mortgages, and many of those wells ran dry this week. Where water remained, there was a steep price to be paid. Lenders' creditors greatly increased their margins which directly results in higher rates for consumers.

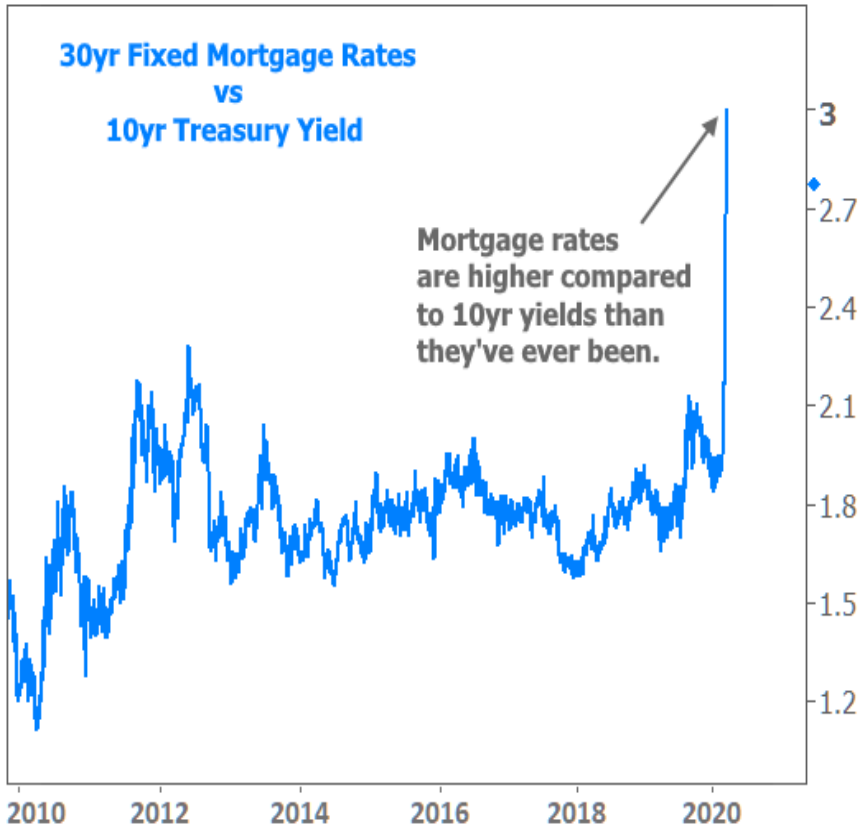

Lower prices from investors... Higher margins from creditors... Underlying momentum toward higher rates after Monday's bounce at all-time lows... It all added up to the **fastest-ever** spike in mortgage rates (seriously... and yes, I'm including 1987 in my look-back).

Mainstream media is a bit behind the curve when it comes to mortgage rates. The most widely cited resource is Freddie Mac's weekly rate survey. Unfortunately, it only captures the first few days of any given week, and a majority of this week's drama unfolded in the 2nd half.

US Housing Market Weekly

Traditional mortgage rate comparisons to 10yr Treasury yields have been thrown out the window by this unprecedented set of circumstances. The average mortgage rate is now higher compared to 10yr Treasury yields than it's EVER been, and by a wide margin at that!

The Federal Reserve is widely expected to cut rates again next week and possibly announce a new round of large-scale bond buying (quantitative easing or "QE"). But remember, a Fed rate cut [doesn't directly affect mortgage rates](#). Fortunately, the mortgage bond market may have pushed prices low enough for investors to start nibbling on new loans instead of pushing them off the table.

Even so, a bounce back toward lower levels will take some time. Rates moved up and out of most peoples' target refi ranges this week. That makes this the **perfect time** to make a game-plan with your friendly neighborhood mortgage pro so all parties can be ready to rock (and LOCK) as soon as rates get into your target range.

Real Talk

At The Rate Shop, we're not your average mortgage banker. We specialize in bringing you ridiculously low interest rates that will make you wonder what the other guys are doing. In fact the **ONLY** objection we ever hear is "your rates sound too good to be true". Well they're not, and here is why...

After 15 years in the retail banking world I was frustrated with the high interest rates that came from that business model. As I looked around at all the bloated layers of management and their expensive salaries and the overhead of running a larger company (think rent costs, employee health and benefit costs, payroll taxes, and on and on) it dawned on me that I was a part of the problem, and the solution, for me at least, was so easy to see.

Start my own mortgage brokerage shop. No expensive executive salaries, no expensive building to pay rent at, no unnecessary employees and all the costs that are associated with that. What happens when you cut out all the fat? You can provide lower rates and lower closing costs. It's simple. Now here is the best part, you still get great service from a local Kansas City Lender. My mission is to let everyone know that low rates and great customer service are **NOT** mutually exclusive.

Thanks for coming along on this journey where Low Rates meet Great Service. The two do **NOT** have to be mutually exclusive. It's just a lie that the big box mortgage companies have been telling you for years. Don't believe me? Give me a call or shoot me a text on my personal cell phone today and compare my rates and costs up against any other lender in the country, and be prepared to be blown away.

Mike Baker
