When Will Prices Care About Rising Rates? And Are Rates Done Rising?

Home prices have been on a tear since late 2020 despite generally higher rates in 2021. In the past few months, rates have upped the ante by surging at one of the fastest paces in history. But in data just released this week, home prices are moving higher at an even faster pace. **What's up with that?**

First, let's take a look at rates. We already examined the phenomenon in detail [last week](#), and there were no major changes this week. Actually, the absence of major changes is one of the most promising developments in weeks. As oil prices and inflation expectations have leveled off, rates have attempted to find some sort of ceiling. Whether it's temporary or longer lasting remains to be seen. The following chart shows the leveling-off process in terms of 10yr Treasury yields, which give us a more detailed short term view of rate trends.

National Average Mortgage Rates

	Rate	Change	Points
Mortgage News Daily			
30 Yr. Fixed	7.07%	+0.02	0.00
15 Yr. Fixed	6.45%	0.00	0.00
30 Yr. FHA	6.51%	+0.02	0.00
30 Yr. Jumbo	7.26%	0.00	0.00
5/1 ARM	7.02%	-0.01	0.00

Freddie Mac

30 Yr. Fixed	6.86%	-0.01	0.00
15 Yr. Fixed	6.16%	+0.03	0.00

Rates as of: 6/28

Market Data

	Price / Yield	Change
MBS UMBS 5.5	98.49	-0.45
MBS GNMA 5.5	99.10	-0.44
10 YR Treasury	4.4079	+0.0099
30 YR Treasury	4.5760	+0.0120

Pricing as of: 6/30 8:43PM EST

Recent Housing Data

		Value	Change
Mortgage Apps	Jun 12	208.5	+15.58%
Building Permits	Mar	1.46M	-3.95%
Housing Starts	Mar	1.32M	-13.15%
New Home Sales	Mar	693K	+4.68%
Pending Home Sales	Feb	75.6	+1.75%
Existing Home Sales	Feb	3.97M	-0.75%
Builder Confidence	Mar	51	+6.25%

Mortgage rates only get one data point per day, so it's much harder to see that they've leveled off a bit this week, but still very easy to see how much they've risen in 2022.

Average 30yr Fixed Mortgage Rates

That brings us **back to this week's big question**: if mortgage rates have moved up so quickly, why are home prices still rising?

There are a few parts to the answer. The first thing we have to consider is the **unprecedented supply/demand** environment in the housing market combined with a surge in incomes, not to mention the chain reaction of people being able to sell their homes for much higher values who then can spend more on their next home. Housing economists will be sorting these variables out for years, but the point is that there's more to home prices than rates.

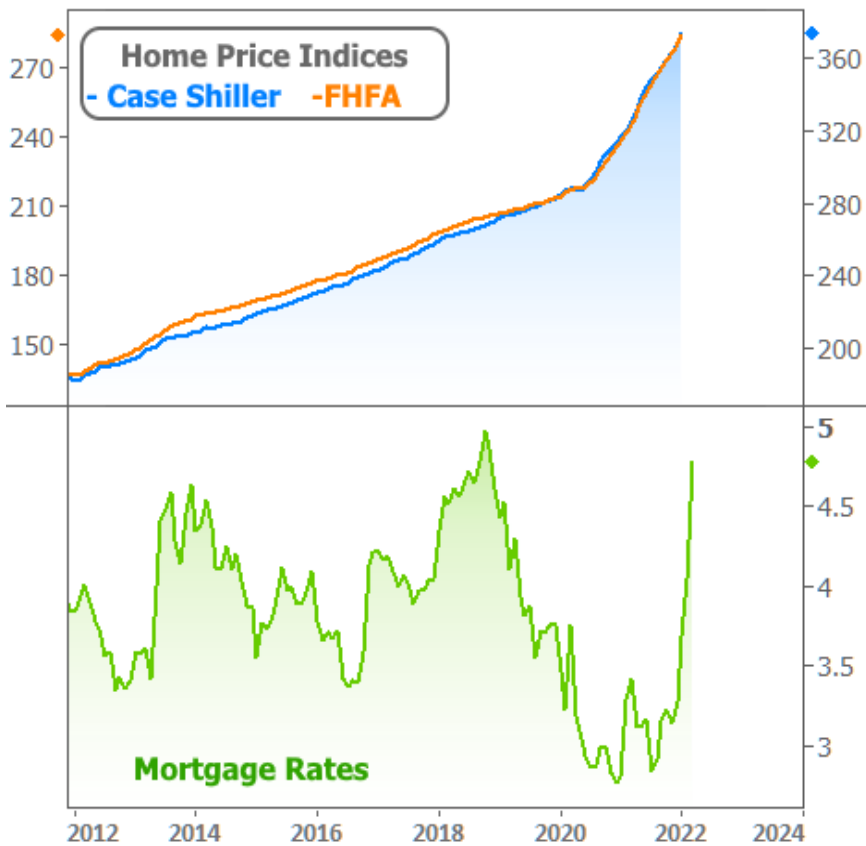

Even so, we can arguably see a few instances of big, unexpected rate spikes resulting in slower home price growth.

The chart also provides **2 clues** as to why home price growth was able to accelerate in January. The **first** clue is the lag time between mortgage rate spikes and the potential impact on prices. It has taken between 4 and 7 months to make it into the data in the past. The **second** clue is that the major home price indices are fairly backward looking in that we just got January's numbers on March 29th.

Does this mean that current home prices are a **ticking time bomb**, set to decline in a few months?

No one knows, actually, and the chart above says **nothing** about home prices **declining**. The chart above is the **RATE OF CHANGE** in prices. If the blue/orange lines are above zero, prices are **rising**. Here's what the same data looks like if we use the actual home price indices:

In other words, prices have done nothing but move up for **more than a decade**, regardless of rate volatility. Could that change in the future? Sure, but also, it might not! The only thing most experts agree on is that the 18-20% per year gains will be subsiding.

Have home prices ever gone down?

Yes, ask anyone who owned real estate during the financial crisis. But that was actually the **only** major instance of falling property values in 40+ years, and it had nothing to do with rising rates.

Bottom line: the recent rate spike will almost certainly contribute to a slower pace of home price growth, but it remains to be seen if prices will actually decline. One thought provoking question for those of you who were tuned in to the property market during the financial crisis is this: if you told the average buyer in 2005-2007 and 2020-2022 that their home would lose 20% of its value over the next few years, who would care more? This isn't to say that home prices are invincible, simply that the market dynamics (and underlying loan program availability) are quite different compared to the financial crisis.

Next Wednesday brings the release of the "minutes" from the most recent Fed meeting. With the Fed's policy outlook being one of the key reasons for the abrupt nature of 2022's rate spike, markets are curious to see if the minutes will offer any new insight to the Fed's potential course of action. In addition, trading is often more volatile (for better or worse) in the first few days of a new quarter. As such, by the end of the week, we should have a much better idea of whether rates are indeed serious about leveling off.

Real Talk

At The Rate Shop, we're not your average mortgage banker. We specialize in bringing you ridiculously low interest rates that will make you wonder what the other guys are doing. In fact the ONLY objection we ever hear is "your rates sound too good to be true". Well they're not, and here is why...

After 15 years in the retail banking world I was frustrated with the high interest rates that came from that business model. As I looked around at all the bloated layers of management and their expensive salaries and the overhead of running a larger company (think rent costs, employee health and benefit costs, payroll taxes, and on and on) it dawned on me that I was a part of the problem, and the solution, for me at least, was so easy to see.

Start my own mortgage brokerage shop. No expensive executive salaries, no expensive building to pay rent at, no unnecessary employees and all the costs that are associated with that. What happens when you cut out all the fat? You can provide lower rates and lower closing costs. It's simple. Now here is the best part, you still get great service from a local Kansas City Lender. My mission is to let everyone know that low rates and great customer service are NOT mutually exclusive.

Thanks for coming along on this journey where Low Rates meet Great Service. The two do NOT have to be mutually exclusive. It's just a lie that the big box mortgage companies have been telling you for years. Don't believe me? Give me a call or shoot me a text on my personal cell phone today and compare my rates and costs up against any other lender in the country, and be prepared to be blown away.
