Home Prices Ended 2015 Strong Despite Market Volatility

The Federal Housing Finance Agency's House Price Index (HPI) for December came in **slightly higher** than the Case-Shiller National Home Price Index did earlier in the week. Case-Shiller put the annual increase in home prices year-over-year at 5.4 percent, FHFA pegged it at 5.8 percent.

The FHFA number is calculated using home sales price information from mortgages sold to or guaranteed by **Fannie Mae and Freddie Mac** whereas Case-Shiller uses data on all sales in the nine census districts.

FHFA said that prices increased 1.4 percent in the fourth quarter of 2015, the 18th consecutive quarterly gain. On a monthly basis prices increased by 0.4 percent from November.

"Instability in financial markets did not seem to put much of a drag on home prices in the fourth quarter," said FHFA Supervisory Economist Andrew Leventis. "The fourth quarter 1.4 percent increase for the U.S. was **in line with the extremely steady-but historically elevated-appreciation rates** we have been observing for several years now," Leventis said.

Value **Change**

While the purchase-only HPI rose 5.8 percent from the fourth quarter of 2014 to the fourth quarter of 2015, prices of other goods and services fell 0.8 percent. The **inflation-adjusted** price of homes rose approximately 6.7 percent over the latest year.

Prices rose from November to December in **eight of the nine census districts**, the exception being the Mountain district where there was a 1.6 percent decrease. The monthly gain was greatest in the East South Central district at 1.9 percent. Annual increases ranged from 2.6 percent in the Middle Atlantic to 7.7 percent in the Pacific district.
