Election Week Was a Win For Mortgage Rates

Heading into the presidential election, there were significant risks for mortgage rates and a wide range of potential outcomes. We knew there would be volatility either way, and we were right!

Volatility goes both ways. Heading into the election, the bond market (the biggest driver of interest rates) was defensive. That means rates (aka bond yields) were heading higher. Shortly into election night, however, yields began to drop **precipitously**. It wasn't until Friday that a strong jobs report and a few additional political developments brought some weakness back to bonds.

Why are bonds moving the way they're moving? The consensus is that a democratic sweep would have resulted in the guarantee of bigger stimulus in January and more spending in general. In turn, government bonds would be used to pay for that stimulus. The higher the issuance of government bonds, the more upward pressure on bond yields/rates, all other things being equal.

National Average Mortgage Rates

	Rate	Change	Points
Mortgage News Daily			
30 Yr. Fixed	6.43%	+0.02	0.00
15 Yr. Fixed	5.95%	0.00	0.00
30 Yr. FHA	5.82%	+0.02	0.00
30 Yr. Jumbo	6.62%	0.00	0.00
5/1 ARM	6.28%	-0.01	0.00
Freddie Mac			
30 Yr. Fixed	6.35%	-0.51	0.00
15 Yr. Fixed	5.51%	-0.65	0.00

Rates as of: 8/30

Recent Housing Data

		Value	Change
Mortgage Apps	Aug 28	226.9	+0.49%
Building Permits	Mar	1.46M	-3.95%
Housing Starts	Mar	1.32M	-13.15%
New Home Sales	Mar	693K	+4.68%
Pending Home Sales	Feb	75.6	+1.75%
Existing Home Sales	Feb	3.97M	-0.75%
Builder Confidence	Mar	51	+6.25%

Moreover, if that stimulus proved effective in helping the economy bounce back, it would only **add** to the upward rate pressure (stronger economy = higher rates).

With that in mind, it **wasn't** the Biden vs Trump narrative that ultimately moved markets as much as the fact that Republicans looked set to keep control of the Senate. Incidentally, some of the rise in rates seen on Friday had to do with Fresh speculation that Georgia's run-off elections could still change the balance of power in the Senate by January.

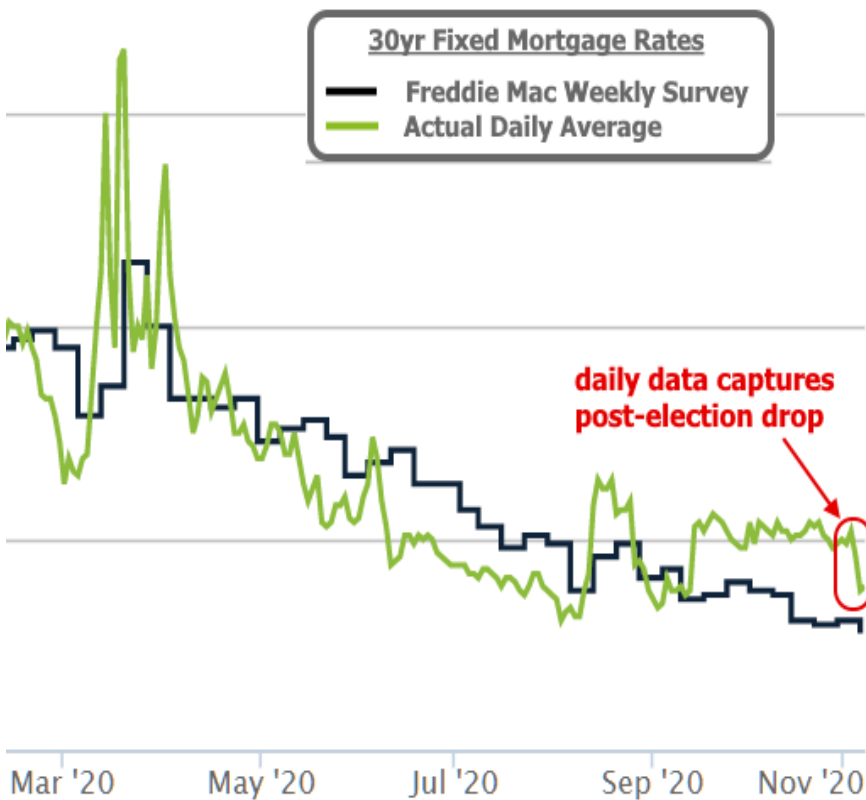

In other words, we're still **not totally out of the woods** with respect to politics putting upward pressure on rates. Perhaps that's why 10yr Treasury yields opted to remain inside their prevailing trend. Or maybe this is simply the slow, steady course leading back from deepest depths of pandemic-driven fear and uncertainty. While it's true that covid case counts are spiking, it's also true that the economy is doing a better job of keeping doors open this time around.

The silver lining to all of the above is the fact that mortgage rates **aren't** operating under exactly the same set of rules as the broader bond market. They were **slower to drop** at the start of the pandemic, and they've been catching up in a carefully controlled pace as lenders ensure they're not overwhelmed by new applications. That means mortgage rates haven't risen as much as Treasury yields over the past 3 months.

Heading into the election, mortgage lenders were understandably cautious, however. For the first time in a long time, they raised rates **more** than the bond market suggested. Fortunately, when bonds weathered the storm, the mortgage market lowered its defenses in grand fashion, making for the best 2-day move we've seen in weeks.

The discrepancy in the chart above (green and black lines moving in different directions recently) has most to do with purchase vs refinance loans. Refis got hit by the [new adverse market fee](#) in August. The fee was then delayed until Dec 1st. That caused some confusion for consumers because the Dec 1st deadline refers to the "delivery date" for the loans in question--a milestone in the loan process that occurs 2-4 weeks AFTER closing.

Bottom line, if it's a conventional refinance that's not already locked and in process, it's getting hit by the fee. There are limited exceptions for lower loan amounts and certain programs geared toward first time homebuyers. Purchase rates, on the other hand, are indeed in line with all-time lows for many lenders.

Professional Mortgage Lending

With over two decades of experience in the mortgage business and a background that sets me apart from many lenders, I bring an unprecedented level of expertise to each client. Through knowledge of current lending markets, and access to innovative products for buyers with unique backgrounds my clients can expect justifiable results quickly and easily. More than simply understanding numbers though; tech-savvy communication ensures quick returns on questions while always keeping their best interests at heart is what truly makes me stand out.

Finding the right professionals to make life's big decisions can be daunting. A great doctor and lawyer, a savvy financial advisor, and a spiritual leader – these are all important considerations. But don't forget your mortgage situation! It pays to have an experienced professional helping you navigate one of life's largest investments in order for it to pay off down the road. Let me offer that expert guidance through my trusted services - I'd love to help make this process as straightforward as possible so you get exactly what you need out of home ownership.
