It's Time To Refinance (Again)

Markets continue to focus on coronavirus numbers first and foremost. When the news is **good**, we tend to see stocks and rates move higher. When the news is **bad**, rates tend to fall and stocks struggle to improve.

The movement is usually more pronounced for stocks. When it comes to rates, however--especially mortgage rates--recent volatility is taking place at a microscopic level compared to recent months. This could continue to be the case until we get a **much clearer** sense of how the pandemic will likely evolve in the context of our attempts to reopen the domestic economy.

Until that happens, of all the places to be flying in a relative holding pattern, this is **as good as it gets** for mortgage rates. When coronavirus first hit the bond market, it was US Treasuries that responded most convincingly. Mortgage rates weren't able to keep pace and that turns out to have been a good thing in hindsight.

Because mortgages lagged Treasuries (the 10yr Treasury yield is the customary point of comparison), they've been more capable of moving lower on the good days and less susceptible to moving higher on the bad days. The net effect is a string of ever-lower all-time lows.

National Average Mortgage Rates

	Rate	Change	Points
Mortgage News Daily			
30 Yr. Fixed	6.89%	0.00	0.00
15 Yr. Fixed	6.33%	+0.01	0.00
30 Yr. FHA	6.33%	+0.01	0.00
30 Yr. Jumbo	7.05%	0.00	0.00
5/1 ARM	6.58%	0.00	0.00

Freddie Mac

30 Yr. Fixed	6.77%	-0.09	0.00
15 Yr. Fixed	6.05%	-0.11	0.00

Rates as of: 7/22

Market Data

	Price / Yield	Change
MBS UMBS 5.5	99.39	-0.01
MBS GNMA 5.5	99.78	+0.00
10 YR Treasury	4.2272	-0.0107
30 YR Treasury	4.4598	-0.0127

Pricing as of: 7/22 10:50PM EST

Recent Housing Data

		Value	Change
Mortgage Apps	Jul 10	206.1	-0.19%
Building Permits	Mar	1.46M	-3.95%
Housing Starts	Mar	1.32M	-13.15%
New Home Sales	Mar	693K	+4.68%
Pending Home Sales	Feb	75.6	+1.75%
Existing Home Sales	Feb	3.97M	-0.75%
Builder Confidence	Mar	51	+6.25%

No... really... this isn't just a term that's being thrown around interchangeably with "really low rates." The average lender is now able to offer conventional 30yr fixed rates in the **high 2% range** for the best scenarios.

That means some homeowners are in a position to benefit from a refinance even if they already refinanced in the past year.

But isn't it a lot of work to refi again?

While some scenarios are more complicated than others, on average, loan applications are seeing an unprecedented amount of appraisal waivers. The industry has worked quickly to adapt to new realities and in many cases, that has made things easier for borrowers.

But aren't there a lot of costs that I'll have to pay that I just paid the last time I refinanced?

Not necessarily. There are different kinds of closing costs. In general, you can **ignore** "stuff you would have paid anyway" like taxes, insurance, and prepaid interest. You won't get hit for those twice.

There's a good chance the lender can pay for a most or all of the other fees like title, escrow, origination, appraisal, etc. Either way, borrowers should consider how long it will take to break even on the refinance by dividing those new hard costs (if any) by the monthly payment savings.

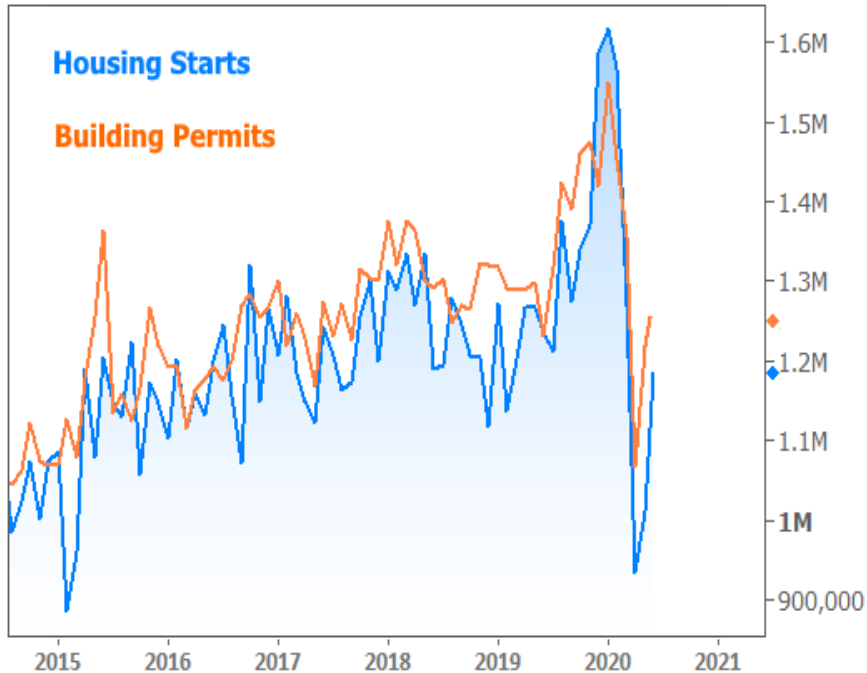

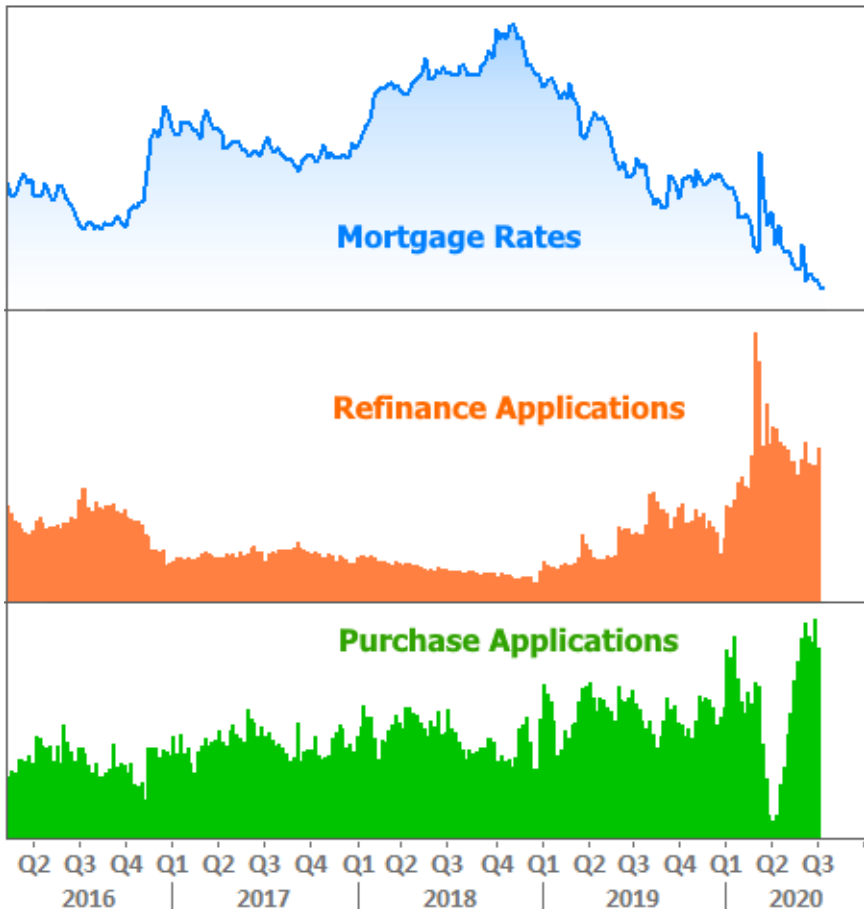

But what if haven't refinanced recently and don't have as many years left on this mortgage.

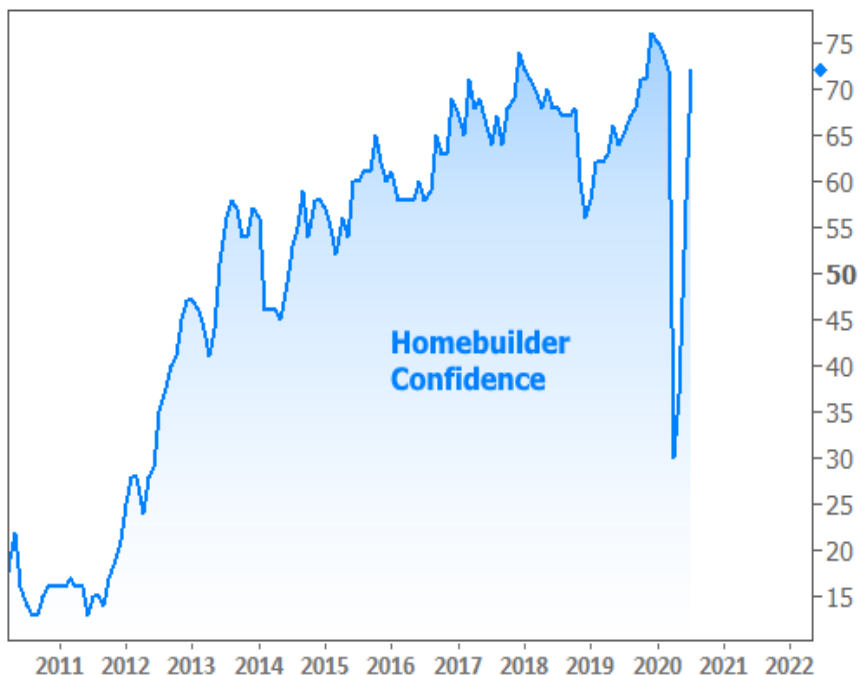

You'll need to do some math here, but generally speaking, if you continue making the same payment but with a new lower interest rate, you might find your home will be paid off sooner with the new loan.

The bottom line:

The current low rate environment is like nothing we've ever seen before. It's easy to tune out the constant advertisements and news stories about "all-time low rates," but this time around, the refinance process is very much worth investigating right now.

Update: Buyer Broker Agreement

After requests from real estate companies, a nonprofit consumer watchdog group the Consumer Federation of America has developed a list of factors to consider when creating a buyer contract in preparation for upcoming practice changes in the industry.

CFA released its "Proposed Criteria for Evaluating Home Buyer Contract Forms" on Tuesday. The 15 criteria focus on the contracts' form – whether the documents are readable and understandable – and content – whether they are fair to homebuyers.

- the document's expiration date (CFA recommends buyers asks for a three-month contract and never sign one longer than six months)
- the right to terminate the contract
- the disclosure that compensation is negotiable
- the broker's compensation clearly stated and that the buyer broker can't receive additional compensation for facilitating a sale
- that any additional fees, such as for showing a home, will be deducted from the broker's commission if there is a successful sale
- that the commission is due only if there is a successful closing
- that buyers have an obligation – for no longer than 60 days, CFA recommends – to pay a broker who earlier showed them a home they purchased after the contract ended
- seller concessions paid directly to buyers
- dual agency not pre-approved by the contract
- an explanation of how a broker treats different buyer clients interested in the same property
- that buyers should not be required to first go through mediation or arbitration if they have a complaint
