What's at Stake With Next Week's Fed Announcement and Inflation Data?

It was mostly a great week for mortgage rates with the average lender near the best levels in months through Thursday. Friday's jobs report pushed rates back up a bit, but not excessively. Next week's two big ticket events could set the tone for the rest of the year. Ultimately, that's exactly what's at stake.

Is it melodramatic to say that the scheduled events in a 48 hour window could set the tone for the rest of the year? Not at all, actually. Rates have been reliably reacting to the same set of inputs for months and if this past week is any indication, it doesn't show signs of stopping.

We can observe these reactions in both long and short term rates. The shortest-term rate is that set by the Fed itself. Since the market is certain the Fed Funds Rate won't change for at least several months, let's take a look at the futures contract that estimates the June 2024 level. The chart shows the same categories of events (Fed communications, jobs, and inflation) having the biggest impacts.

Let's zoom in to focus on this week's movement specifically. There were two key reports that generated both movement and volume: Job Openings on

National Average Mortgage Rates

	Rate	Change	Points
--	------	--------	--------

Mortgage News Daily

30 Yr. Fixed	6.44%	-0.04	0.00
15 Yr. Fixed	5.97%	-0.03	0.00
30 Yr. FHA	5.90%	-0.04	0.00
30 Yr. Jumbo	6.66%	-0.02	0.00
5/1 ARM	6.32%	-0.06	0.00

Freddie Mac

30 Yr. Fixed	6.46%	-0.40	0.00
15 Yr. Fixed	5.62%	-0.54	0.00

Rates as of: 8/23

Market Data

	Price / Yield	Change
MBS UMBS 5.5	100.93	+0.26
MBS GNMA 5.5	100.83	+0.22
10 YR Treasury	3.7999	-0.0531
30 YR Treasury	4.0908	-0.0309

Pricing as of: 8/23 5:59PM EST

Recent Housing Data

	Value	Change
Mortgage Apps	Aug 14 251.3	+16.83%
Building Permits	Mar 1.46M	-3.95%
Housing Starts	Mar 1.32M	-13.15%
New Home Sales	Mar 693K	+4.68%
Pending Home Sales	Feb 75.6	+1.75%
Existing Home Sales	Feb 3.97M	-0.75%
Builder Confidence	Mar 51	+6.25%

Tuesday and the big jobs report on Friday.

Job openings remain historically high, but have been moving in a rate-friendly direction. The Fed wants to see the labor market cool off a bit or it worries that inflation will be harder to control. That's why this week's job openings data helped rates move lower.

Despite being in line with historical levels, Friday's nonfarm payrolls (a count of new jobs created or lost) made a different case.

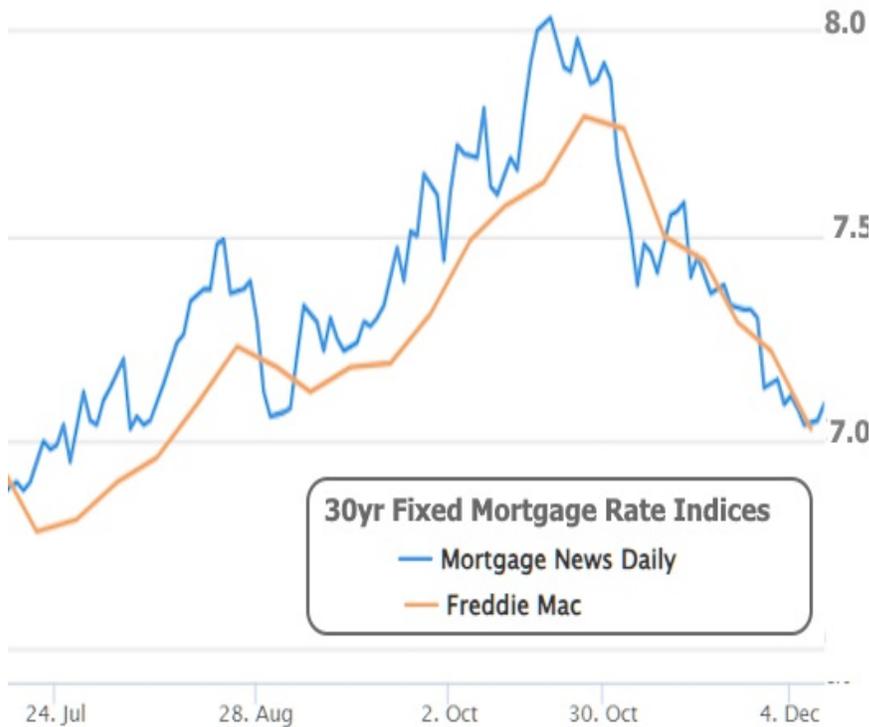

You can't tell by looking at the chart, but payrolls came in higher than expected. The unemployment rate was also lower than expected. Neither are good for rates, but the reaction wasn't extreme as far as longer-term rates (like 10yr Treasury yields) were concerned.

10yr Treasury Yield

Mortgage rates also moved a hair higher, but are still effectively in line with their best levels in months.

If we zoom out on the Treasury chart in a similar manner, Friday's yield spike also looks like no big deal in the bigger picture. It's more of an afterthought in the process of erasing the losses seen after the Fed spooked the rate market at the September meeting.

That brings us full circle with next week's Fed meeting. The Fed's September announcement spooked the bond market due to the proverbial "DOTS." This refers to the dot plot the Fed uses to convey its quarterly forecast for the general path of the Fed Funds Rate.

September's dots showed the Fed holding the Fed Funds Rate "higher for longer"--a likelihood that financial markets adjusted to by the end of October. November and early December have seen traders pull back on their Fed rate expectations.

The timing is important because next Wednesday is the first new dot plot since September 20th. Traders hope/expect to see a more measured outlook versus spooky September. They'll almost certainly get it, but the question is HOW much more measured.

The Fed may not even know their final answers to the dot plot questions at this point. Some of the dots could be changing right up to the buzzer due to the timing of the Consumer Price Index (CPI) which comes out just over 24 hours before the Fed announcement.

CPI has been moving in the right direction, but we need to see a few more months of progress before the Fed would truly be in a position to consider rate cuts. If Tuesday's example shows good progress, some of the Fed's thought process may end up in the dot plot on Wednesday. Rates may have a volatile response to either event.

National Association of Realtors - New Rules & Open Houses

New rules stemming from the National Association of Realtors' commission lawsuit settlement went into effect Saturday following years of litigation, potentially upending the industry, including how agents get paid.

This week, I have been hearing from agents, brokers, MLS executives, portals and other insiders as the rules roll out.

COMMISSION QUESTIONS: In the wake of NAR's new settlement rules, many buyer's agents are suddenly confronting a new question: What commission should they ask for in their buyers' broker representation agreements?

Here are a few responses found in a real estate master-mind group:

"I'm asking the buyer to pay my rate but advising them the seller may be offering something towards that," one agent responded. "If that's the case they only have to pay what's left."

"Sit down with your buyer and a trusted loan officer" another suggested. "Have the loan officer complete the various costs including your compensation and without any compensation (seller contributes). Once the buyer sees how much they have to come up with, they can make a decision. Then you make yours."

Some commenters also said that their brokers are making recommendations.

"This thread is illegal," one commenter argued, echoing a number of other remarks. "It is price fixing and the whole reason the U.S. Department of Justice got involved. Commission/Concessions should only be discussed between the agent and his/her client, never among agents."

The debate highlights the fact that many practical issues stemming from the settlement are yet to be worked out – and that additional litigation is top of mind for many real estate professionals,

OPEN HOUSE, OPEN QUESTION: Among the real estate professionals watching how the settlement changes unfolded this weekend was Randy Bell of Life Realty – The District in Henderson, NV who told me that "Buyers appear to be leery about signing short-term agreements and may favor open houses over individual tours until they're at ease with the rule." He went on to state "It'll be very interesting to see whether open house traffic increases, which I expect it will once buyers understand they don't have the same friction with agreements by going directly to open houses,"

One stat I'm going to be looking at is the number of open houses relative to active listings. I'll have numbers for you in the weeks to come. ...More to follow in future Newsletters.
