Inflation Data Keeps Low Rate Hopes Alive

The much-anticipated Consumer Price Index (CPI) was released this week. For those seeking evidence that inflation will soon be back at the Fed's target level, it wasn't the triumph it might have been. Even so, rates managed to move lower.

Mortgage rates and, indeed, most rates are determined by trading levels in the bond market. Bond yields/rates move higher when inflation is high, and the market has been waiting on signs of lower inflation before trading in a way that allows interest rates to move lower.

The Consumer Price Index (CPI) is the biggest name in monthly inflation reports. It's caused big reactions in rates many times over the past few years. In recent months, it's been showing more and more promise regarding a return to inflation levels that would allow for significantly lower rates.

But CPI has given false hope before, so traders are wary. This week's report definitely stopped short of providing resounding confirmation that inflation is defeated. That said, it didn't send any signals that were too troubling either.

With that in mind, it's not too surprising that rates actually didn't move much in response to CPI. If anything, the initial impulse was toward slightly higher rates. It wasn't until the following day's Producer Price Index (PPI) that bond traders saw better evidence of calmer inflation. Both CPI and PPI have been moving lower, but PPI is now all the way back down to target levels.

National Average Mortgage Rates

	Rate	Change	Points
Mortgage News Daily			
30 Yr. Fixed	6.89%	0.00	0.00
15 Yr. Fixed	6.33%	+0.01	0.00
30 Yr. FHA	6.33%	+0.01	0.00
30 Yr. Jumbo	7.05%	0.00	0.00
5/1 ARM	6.58%	0.00	0.00
Freddie Mac			
30 Yr. Fixed	6.77%	-0.09	0.00
15 Yr. Fixed	6.05%	-0.11	0.00

Rates as of: 7/22

Market Data

	Price / Yield	Change
MBS UMBS 5.5	99.31	-0.09
MBS GNMA 5.5	99.70	-0.07
10 YR Treasury	4.2706	+0.0327
30 YR Treasury	4.4851	+0.0383

Pricing as of: 7/22 12:56PM EST

Recent Housing Data

		Value	Change
Mortgage Apps	Jul 10	206.1	-0.19%
Building Permits	Mar	1.46M	-3.95%
Housing Starts	Mar	1.32M	-13.15%
New Home Sales	Mar	693K	+4.68%
Pending Home Sales	Feb	75.6	+1.75%
Existing Home Sales	Feb	3.97M	-0.75%
Builder Confidence	Mar	51	+6.25%

The following chart shows how 10yr Treasury yields (which tend to correlation with mortgage rate movement) were reacting throughout the week:

Note the initially bad reaction to CPI. There was a recovery that same afternoon for a variety of potential reasons. At least one of those reasons had to do with speculation that the Fed is still on track to deliver a series of rate cuts this year in addition to making rate-friendly changes to the way it's managing its bond portfolio. Fed policy expectations are even easier to see when we look at actual Fed Funds Rate expectations which are now at the lowest levels since July.

**Fed Funds Rate Expectations, end of 2024
(based on Fed Funds Futures)**

Mortgage rates don't correlate perfectly with Fed Funds Rate expectations (one reason we often advise that a Fed rate cut/hike doesn't mean a mortgage rate cut/hike). As such, they're not back below the recent lows, but they definitely haven't moved much higher. This week's gentle descent means we're continuing to hold a vast majority of the improvement seen in Nov/Dec.

Looking ahead, while next week doesn't have any economic data on the same level as CPI, Wednesday's Retail Sales report can definitely move the needle. It's expected to improve slightly to 0.4% month over month after hitting 0.3% last time.

Beyond the data, we'll hear from several Fed speakers and there's been some speculation that Waller's appearance at the Brookings Institute will bring some important concepts regarding the precursors for friendlier rate policy in 2024. That will happen on Tuesday, which is the first business day of the week next week due to the Martin Luther King Jr. holiday.

While not as much of a factor for interest rates, we'll also get updates on several key housing metrics including new home construction, builder confidence, and Existing Home Sales.

Update: Buyer Broker Agreement

After requests from real estate companies, a nonprofit consumer watchdog group the Consumer Federation of America has developed a list of factors to consider when creating a buyer contract in preparation for upcoming practice changes in the industry.

CFA released its "Proposed Criteria for Evaluating Home Buyer Contract Forms" on Tuesday. The 15 criteria focus on the contracts' form – whether the documents are readable and understandable – and content – whether they are fair to homebuyers.

- the document's expiration date (CFA recommends buyers asks for a three-month contract and never sign one longer than six months)
- the right to terminate the contract
- the disclosure that compensation is negotiable
- the broker's compensation clearly stated and that the buyer broker can't receive additional compensation for facilitating a sale
- that any additional fees, such as for showing a home, will be deducted from the broker's commission if there is a successful sale
- that the commission is due only if there is a successful closing
- that buyers have an obligation – for no longer than 60 days, CFA recommends – to pay a broker who earlier showed them a home they purchased after the contract ended
- seller concessions paid directly to buyers
- dual agency not pre-approved by the contract
- an explanation of how a broker treats different buyer clients interested in the same property
- that buyers should not be required to first go through mediation or arbitration if they have a complaint
