Biggest Weekly Jump For Rates In Quite a While. Will it Keep Going or Calm Down?

Whether we're talking about mortgage rates or a quintessential yard stick of the rate world like the 10yr Treasury yield, it was the roughest week in quite a while.

Nearly every corner of the market continues reacting in volatile fashion to last week's tariff announcement and the subsequent updates. Momentum toward higher rates took on a life of its own this week for laundry list of mostly esoteric reasons.

Meanwhile, the typical sources of market inspiration fell on deaf ears. Notably, both of this week's inflation reports were much lower than expected. That would typically be great news, but instead, rates kept on moving relentlessly higher.

When it comes to 10yr Treasuries, you would need to go back to 1981 to see a bigger jump.

National Average Mortgage Rates

	Rate	Change	Points
Mortgage News Daily			
30YR Fixed	7.35%	+0.02	0.00
15YR Fixed	7.00%	-0.01	0.00
30YR FHA	6.99%	+0.01	0.00
30YR Jumbo	7.60%	0.00	0.00
7/6 SOFR	6.86%	+0.01	0.00
30YR VA	7.00%	+0.01	0.00

Rates as of: 10/28

MBS and Treasury

	Price / Yield	Change
MBS UMBS 6.0	99.67	+0.08
10 YR Treasury	4.9907	-0.0258
30 YR Treasury	5.3168	-0.0285

Pricing as of: 10/28 11:16PM EST

Recent Housing Data

		Value	Change
Mortgage Apps	Oct 14	188.6	-5.32%
Building Permits	Sep	1.4M	+0.43%
Housing Starts	Sep	1.22M	-4.24%
New Home Sales	Aug	684K	+12.69%
Pending Home Sales	Aug	71.2	0%
Existing Home Sales	Oct	3.99M	+0.25%
Builder Confidence	Oct	29	-9.38%

Is this alarming? Does it suggest that some massive shift is taking place that will re-write the global economic order?

Some would say yes. Others would laugh. Many would be somewhere in between with quite a few qualifying ideas. No one would deny that the answer ultimately depends on things that have yet to happen.

One great way to find some perspective is to consider the 1 week chart of 10yr Treasury yields above against a 2 week chart below. In other words, it's the exact same data, but over a 2 week time frame instead of week-over-week. Spoiler alert: it's not ideal, but definitely not as alarming as the first chart.

With that in mind, there's a lot riding on the coming week and a half to flesh out the bigger picture. In the meantime, mortgage rates are definitely elevated--much more so than the typical news article has yet conveyed.

In the chart above, it's normal for the blue line to generally operate above the other two. The important observation is the extent to which big moves in the blue line (actual daily average rates) lead subsequent moves in the other lines (surveys that have a reporting lag). Unfortunately, many news outlets report on the weekly surveys as if those rates are still available. Instead, they're just a look back to what was available last week.

Here too, there's perspective. After all, mortgage rates were noticeably higher just a few months ago. Moreover, we've certainly seen a few weeks with a 0.50% jump over the past few years. So the question remains: will the coming weeks add insult to injury, or will they help mellow out the bigger picture message? The answer can't be known today. The best bet is to understand the potential for additional volatility and be prepared to react accordingly.

A Lower Price or a Lower Rate? Don't Guess. Compare: 10-22-2026

What Every Agent Should Know:---

With mortgage rates challenging affordability and buyers hesitant to make decisions, sellers are increasingly willing to negotiate. But here's a question every REALTOR® should consider:---

Is your buyer better off negotiating a lower purchase price—or asking the seller to contribute toward a permanently lower interest rate?---

A price reduction lowers the mortgage balance, but the resulting monthly payment savings may be surprisingly small.---

Alternatively, a seller contribution toward a permanent interest-rate buydown could provide substantially greater monthly payment relief, even with a higher purchase price.---

But what if mortgage rates decline in the next 6, 12, or 24 months?---

That's the question nobody can answer with certainty.---

A buyer who negotiates a larger price reduction may benefit from a lower loan balance and potentially refinance if rates decline. A buyer who secures a permanently lower rate benefits immediately, without depending on future market conditions.---

Both strategies have merit. The right answer depends on the numbers, the buyer's financial priorities, and how long they expect to keep the mortgage.---

For listing agents, this creates another negotiating opportunity. A seller contribution toward financing costs may be more attractive to a payment-conscious buyer than another reduction in asking price.---

Before your buyer requests a price reduction—or your seller agrees to one—give me a call.---

Let's compare the alternatives. Sometimes the smartest negotiation isn't about the price. It's about how the transaction is structured.---
