Markets Calmed Down Immensely This Week. Lowest Rates since April 7th

Please note that this newsletter is fiercely apolitical. There is no judgment on whether any given political development is good or bad. We are only interested in how financial and housing markets are reacting.

Significant market volatility has been all over the news since the April 2nd tariff announcement, but this week went a long way toward restoring a sense of calm. In addition to tariff-related impacts, last week's volatility was also exacerbated by Trump's comments on Fed Chair Powell. Up until that point, bonds (and thus, interest rates) were having a solid week.

Trump initially doubled down on his criticism of Powell as the new week began. Markets weren't happy about it with stocks and bonds both losing ground sharply on Monday morning.

Less than a day later, Trump reversed his stance on Powell, saying he was never thinking about firing the Fed Chair. Markets loved it. They also loved a big apparent shift in the tone on trade negotiations with China. Throughout the week, traders were left with the sense that the application of tariffs and trade policy would be much more thoughtful than initially feared. This was a win for both stocks and bonds.

National Average Mortgage Rates

	Rate	Change	Points
Mortgage News Daily			
30YR Fixed	7.35%	+0.02	0.00
15YR Fixed	7.00%	-0.01	0.00
30YR FHA	6.99%	+0.01	0.00
30YR Jumbo	7.60%	0.00	0.00
7/6 SOFR	6.86%	+0.01	0.00
30YR VA	7.00%	+0.01	0.00

Rates as of: 10/28

MBS and Treasury

	Price / Yield	Change
MBS UMBS 6.0	99.67	+0.08
10 YR Treasury	4.9907	-0.0258
30 YR Treasury	5.3168	-0.0285

Pricing as of: 10/28 11:16PM EST

Recent Housing Data

		Value	Change
Mortgage Apps	Oct 14	188.6	-5.32%
Building Permits	Sep	1.4M	+0.43%
Housing Starts	Sep	1.22M	-4.24%
New Home Sales	Aug	684K	+12.69%
Pending Home Sales	Aug	71.2	0%
Existing Home Sales	Oct	3.99M	+0.25%
Builder Confidence	Oct	29	-9.38%

The reaction to the clarification/retraction of Trump's Powell comments was the biggest to-do of the week. After that, an absence of new tariff drama (as well as a few more indications of less onerous tariff policies) helped markets calmly extend their gains. As a reminder, bonds are gaining when yields (the blue line) are moving lower.

By Friday, one could argue that the bond market has made a bit of a round trip back to the levels that prevailed in an uneventful, sideways fashion for more than a month ahead of the tariff announcement.

Are we "back?" Yes, technically, but there are caveats. First up: mortgage rates are not as "back" as Treasury yields. This is especially true if you're looking at weekly survey levels, but just barely true based on more timely daily averages from MND.

The other caveat is the eternal truth of following markets and rates: we only ever know where we are today. The future is uncertain, even if it seems like we breathe a little easier regarding tariff announcements causing volatility.

In general, and although tariff policy will still matter greatly, it will be the impact on the economy that does more to guide the market reaction. To that end, we already got a glimpse of tariffs spilling over to economic data in one of this week's reports (S&P Global's PMI reports showed sharply higher price pressures due to tariffs).

The coming week brings a significantly more active and consequential economic calendar. Every day holds at least one event with the power to cause some market movement depending on the results. Of particular note are the final three days of the week culminating in Friday's jobs report--generally considered to be the most important data on any given month as far as interest rates are concerned.

A Lower Price or a Lower Rate? Don't Guess. Compare: 10-22-2026

What Every Agent Should Know:---

With mortgage rates challenging affordability and buyers hesitant to make decisions, sellers are increasingly willing to negotiate. But here's a question every REALTOR® should consider:---

Is your buyer better off negotiating a lower purchase price—or asking the seller to contribute toward a permanently lower interest rate?---

A price reduction lowers the mortgage balance, but the resulting monthly payment savings may be surprisingly small.---

Alternatively, a seller contribution toward a permanent interest-rate buydown could provide substantially greater monthly payment relief, even with a higher purchase price.---

But what if mortgage rates decline in the next 6, 12, or 24 months?---

That's the question nobody can answer with certainty.---

A buyer who negotiates a larger price reduction may benefit from a lower loan balance and potentially refinance if rates decline. A buyer who secures a permanently lower rate benefits immediately, without depending on future market conditions.---

Both strategies have merit. The right answer depends on the numbers, the buyer's financial priorities, and how long they expect to keep the mortgage.---

For listing agents, this creates another negotiating opportunity. A seller contribution toward financing costs may be more attractive to a payment-conscious buyer than another reduction in asking price.---

Before your buyer requests a price reduction—or your seller agrees to one—give me a call.---

Let's compare the alternatives. Sometimes the smartest negotiation isn't about the price. It's about how the transaction is structured.---
