Mortgage Market in Holiday Mode Despite Big-Ticket Data

The two most important economic reports of the month were released this week. Both showed promising results for rates, and although rates improved, the reaction was **smaller than expected**.

First up was November's jobs report, which came out on Tuesday morning. It showed the highest unemployment rate since 2021 at 4.6%--well above the 4.4% forecast.

Under normal circumstances, this would have resulted in a fairly sharp drop in rates. But in the current case, the underlying bond market **barely budged**.

There are a few specific reasons this may have been the case:

- 1. The participation rate also increased by 0.1%. This means more people consider themselves part of the labor force. When this metric moves higher, it limits the negative implications of higher unemployment to some extent.
- 2. The unrounded unemployment rate was 4.564% vs 4.440% in September, just barely more than a 0.1% increase.
- 3. A substantial majority of the increase was attributable to workers on

National Average Mortgage Rates

	Rate	Change	Points
Mortgage News Daily			
30YR Fixed	7.35%	+0.02	0.00
15YR Fixed	7.00%	-0.01	0.00
30YR FHA	6.99%	+0.01	0.00
30YR Jumbo	7.60%	0.00	0.00
7/6 SOFR	6.86%	+0.01	0.00
30YR VA	7.00%	+0.01	0.00

Rates as of: 10/28

MBS and Treasury

	Price / Yield	Change
MBS UMBS 6.0	99.67	+0.08
10 YR Treasury	4.9907	-0.0258
30 YR Treasury	5.3168	-0.0285

Pricing as of: 10/28 11:16PM EST

Recent Housing Data

		Value	Change
Mortgage Apps	Oct 14	188.6	-5.32%
Building Permits	Sep	1.4M	+0.43%
Housing Starts	Sep	1.22M	-4.24%
New Home Sales	Aug	684K	+12.69%
Pending Home Sales	Aug	71.2	0%
Existing Home Sales	Oct	3.99M	+0.25%
Builder Confidence	Oct	29	-9.38%

temporary layoff.

Taken together, these factors go a long way toward **counteracting an otherwise gloomy message** for the labor market (and a friendly message for interest rates).

The next big-ticket report was November's Consumer Price Index (CPI) which came out on Thursday. We already knew the data collection for this report was impacted by the government shutdown, but inflation came in so far below economists' forecasts that traders were hesitant to trade accordingly. To be fair, bond yields and mortgage rates did hit their best levels of the week shortly thereafter, but **most of that movement was already in place before CPI came out.**

A final consideration in the rate market's underwhelming reaction is the fact that it's the 2nd half of December and there's always a caveat for inconsistent trading this time of year. Combine that with doubts about the data collection, and traders are content to wait for the next set of reports in January before getting back in a more normal rhythm.

The next two weeks will be even more **deeply** affected by holiday trading vibes. Markets are closed on Christmas Day and bonds will close early on Christmas Eve. While Friday is technically a fully open day, it will have drastically lower participation than normal. The same pattern of closures repeats the following week (Wed = half day, Thu = closed, Fri = might as well be closed). The **implication** is that rate movement can be **more random** and subject to change until new econ data starts coming out in January.

A Lower Price or a Lower Rate? Don't Guess. Compare: 10-22-2026

What Every Agent Should Know:---

With mortgage rates challenging affordability and buyers hesitant to make decisions, sellers are increasingly willing to negotiate. But here's a question every REALTOR® should consider:---

Is your buyer better off negotiating a lower purchase price—or asking the seller to contribute toward a permanently lower interest rate?---

A price reduction lowers the mortgage balance, but the resulting monthly payment savings may be surprisingly small.---

Alternatively, a seller contribution toward a permanent interest-rate buydown could provide substantially greater monthly payment relief, even with a higher purchase price.---

But what if mortgage rates decline in the next 6, 12, or 24 months?---

That's the question nobody can answer with certainty.---

A buyer who negotiates a larger price reduction may benefit from a lower loan balance and potentially refinance if rates decline. A buyer who secures a permanently lower rate benefits immediately, without depending on future market conditions.---

Both strategies have merit. The right answer depends on the numbers, the buyer's financial priorities, and how long they expect to keep the mortgage.---

For listing agents, this creates another negotiating opportunity. A seller contribution toward financing costs may be more attractive to a payment-conscious buyer than another reduction in asking price.---

Before your buyer requests a price reduction—or your seller agrees to one—give me a call.---

Let's compare the alternatives. Sometimes the smartest negotiation isn't about the price. It's about how the transaction is structured.---
