Rates Remain Elevated "Just Because," But Still Under Recent Highs

Last week's newsletter flagged an uncommonly high level of quarter-end trading volatility as a key contributor to a surprise mid-week rate spike. We got another dose of that drama this week, but things calmed down by the end.

Bond market drama creates rate drama because rates are directly based on bonds. Due to the immense size and complexity of the bond market (and broader financial market), and because trading strategies can vary based on who's doing the trading, there is no satisfying way to measure exactly why things happen the way they do at quarter-end.

What we do know is that a massive amount of money changes hands in a very short time window, with a lot of last-minute settlement taking place right up to the end-of-quarter cut-off. There's also quarter-end trading that begins impacting trading levels several weeks in advance, but it was the "last minute" stuff that hit the bond market this week.

This resulted in Tuesday's rates jumping quickly higher for no apparent reason. Wednesday added a bit of an aftershock as mortgage lenders got caught up with Tuesday's volatility (some lenders don't fully account for all the volatility in a trading day if it happens late enough in the day).

All told, this took the average 30yr fixed rate an eighth of a point higher on the week as of Wednesday. What happened next was a mixed blessing depending on which side you root for. Fans of strong jobs growth got bad news on Thursday morning with June's job count coming in at 57k--well short of the 110k median forecast.

But as is ever the case, bad news for the labor market is generally good news for rates. Bonds improved following the data and mortgage rates managed to recover almost half of the ground lost earlier in the week.

Nonetheless, the week ends with 30yr fixed rates 0.07% higher than last week for the average lender. NOTE: weekly survey-based rate data (i.e. MBA/Freddie Mac) showed lower rates this week because their methodologies have not yet captured Wednesday's rate spike (Freddie technically has, but its impact is diluted because its averaged with the preceding 4 business days).

National Average Mortgage Rates

	Rate	Change	Points
Mortgage News Daily			
30YR Fixed	7.35%	+0.02	0.00
15YR Fixed	7.00%	-0.01	0.00
30YR FHA	6.99%	+0.01	0.00
30YR Jumbo	7.60%	0.00	0.00
7/6 SOFR	6.86%	+0.01	0.00
30YR VA	7.00%	+0.01	0.00

Rates as of: 10/28

MBS and Treasury

	Price / Yield	Change
MBS UMBS 6.0	99.59	0.00
10 YR Treasury	5.0021	-0.0144
30 YR Treasury	5.3216	-0.0237

Pricing as of: 10/28 9:38PM EST

Recent Housing Data

		Value	Change
Mortgage Apps	Oct 14	188.6	-5.32%
Building Permits	Sep	1.4M	+0.43%
Housing Starts	Sep	1.22M	-4.24%
New Home Sales	Aug	684K	+12.69%
Pending Home Sales	Aug	71.2	0%
Existing Home Sales	Oct	3.99M	+0.25%
Builder Confidence	Oct	29	-9.38%

Bottom line: rates are higher this week, but thankfully still not as high as they were in early June or mid-May. Next week brings a smattering of economic data in addition to the minutes of the most recent Fed meeting. The market continues pricing in a higher likelihood of Fed rate hikes by the end of the year.

A Lower Price or a Lower Rate? Don't Guess. Compare: 10-22-2026

What Every Agent Should Know:---

With mortgage rates challenging affordability and buyers hesitant to make decisions, sellers are increasingly willing to negotiate. But here's a question every REALTOR® should consider:---

Is your buyer better off negotiating a lower purchase price—or asking the seller to contribute toward a permanently lower interest rate?---

A price reduction lowers the mortgage balance, but the resulting monthly payment savings may be surprisingly small.---

Alternatively, a seller contribution toward a permanent interest-rate buydown could provide substantially greater monthly payment relief, even with a higher purchase price.---

But what if mortgage rates decline in the next 6, 12, or 24 months?---

That's the question nobody can answer with certainty.---

A buyer who negotiates a larger price reduction may benefit from a lower loan balance and potentially refinance if rates decline. A buyer who secures a permanently lower rate benefits immediately, without depending on future market conditions.---

Both strategies have merit. The right answer depends on the numbers, the buyer's financial priorities, and how long they expect to keep the mortgage.---

For listing agents, this creates another negotiating opportunity. A seller contribution toward financing costs may be more attractive to a payment-conscious buyer than another reduction in asking price.---

Before your buyer requests a price reduction—or your seller agrees to one—give me a call.---

Let's compare the alternatives. Sometimes the smartest negotiation isn't about the price. It's about how the transaction is structured.---
